State Superintendent's Advisory Council

The State Superintendent's Advisory Council is composed of the following nine Division Superintendents who represent the regions as indicated:

Region No. 1: Chairman, Andrew Wright, Superintendent of Greensville County Public Schools, Box 958, Emporia, Virginia 23847.

Amelia Co.	Goochland Co.	Nottoway Co.
Brunswick Co.	Greensville Co.	Petersburg City
Chesterfield Co.	Hanover Co.	Powhatan Co.
Colonial Heights City	Henrico Co.	Prince Edward Co.
Cumberland Co.	Lunenburg Co.	Richmond City
Dinwiddie Co.	Mecklenburg Co.	Southampton Co.
		Sussex Co.

Region No. 2: Chairman, C. Alton Lindsay, Superintendent of Hampton City Public Schools, Hampton, Virginia 23369.

Accomack Co.	James City Co.	Prince George Co.
Charles City Co.	Nansemond Co.	Suffolk City
Chesapeake City	New Kent Co.	Surry Co.
Franklin City	Newport News City	Virginia Beach City
Hampton City	Norfolk City	Williamsburg City
Hopewell City	Northampton Co.	York Co.
Isle of Wight Co.	Portsmouth City	

Region No. 3: Chairman, Eldon W. Christopher, Superintendent of Essex-Middlesex County Public Schools, Tappahannock, Virginia 22560.

Caroline Co.	King George Co.	Northumberland Co.
Essex Co.	King William Co.	Richmond Co.
Fredericksburg City	Lancaster Co.	Spotsylvania Co.
Gloucester Co.	Mathews Co.	Stafford Co.
King and Queen Co.	Middlesex Co.	Westmoreland Co.

Region No. 4: Chairman, O. A. Norton, Superintendent of Rappahannock-Warren County Public Schools, Front Royal 22630.

Alexandria City	Falls Church City	Prince William Co.
Arlington Co.	Fauquier Co.	Rappahannock Co.
Clarke Co.	Frederick Co.	Shenandoah Co.
Culpeper Co.	Loudoun Co.	Warren Co.
Fairfax Co.	Page Co.	Winchester City
Fairfax City		

Region No. 5: Chairman, William Wetsel, Superintendent of Greene-Madison County Public Schools, Stanardsville, Virginia 22973.

Albemarle Co.	Fluvanna Co.	Madison Co.
Buckingham Co.	Greene Co.	Nelson Co.
Charlottesville City	Louisa Co.	Orange Co.

Region No. 6: Chairman, F. B. Glenn, Superintendent of Waynesboro City Public Schools, 301 Pine Avenue, Waynesboro 22980.

Alleghany Co.	Clifton Forge City	Rockingham Co.
Augusta Co.	Harrisonburg City	Covington City
Bath Co.	Highland Co.	Staunton City
Buena Vista City	Rockbridge Co.	Waynesboro City
		Lexington City

Region No. 7: Chairman, O. T. Bonner, Superintendent of Danville City Public Schools, Danville, Virginia.

Amherst Co.	Campbell Co.	Halifax Co.
Appomattox Co.	Charlotte Co.	Lynchburg City
Bedford Co.	Danville City	Pittsylvania Co.

Region No. 8: Chairman, R. P. Reynolds, Superintendent of Carroll County Public Schools, Hillsville, Virginia 24343.

Bland Co.	Giles Co.	Radford City
Botetourt Co.	Henry Co.	Roanoke Co.
Carroll Co.	Martinsville City	Roanoke City
Craig Co.	Montgomery Co.	Wythe Co.
Floyd Co.	Patrick Co.	
Franklin Co.	Pulaski Co.	

Region No. 9: Chairman, J. Leonard Mauck, Superintendent of Smyth County Public Schools, Marion, Virginia 24354.

Bristol City	Lee Co.	Tazewell Co.
Buchanan Co.	Norton City	Washington Co.
Dickenson Co.	Russell Co.	Wise Co.
Galax City	Scott Co.	
Grayson Co.	Smyth Co.	

President of the State Board of Education, Mosby G. Perrow, Jr. (Ex officio)

Ninety-Seventh Annual Report of the Superintendent of Public Instruction, 1966-67

INTRODUCTION

The year ending June 30, 1967, was one of the most important years in the history of public education in Virginia.

The year was highlighted by the Governor's Conference on Education, which was held in Richmond on October 5 and was sponsored by Governor Mills E. Godwin, Jr. The conference was called so that educators could explore ways to upgrade the quality of public education in Virginia and provide assistance to those localities having the greatest educational needs.

At the conference, the Governor said in his keynote address, "It is time to examine education as we never have before, to find its weaknesses and strength, to assess its needs in the light of the Virginia which is taking shape around us, and of her place in a nation which is speeding to new heights."

The concern expressed by the Governor was disseminated to a larger audience through a series of regional conferences which were held in eight areas of Virginia in February and March. The regional meetings, which were planned by a steering committee appointed by the Governor, were followed by local conferences intended to adapt the quality-education message to local needs and objectives.

The Governor's Conference and the regional conferences reflected and gave impetus to a great upsurge of interest in Virginia's public schools.

Paralleling this "grassroots approach" to quality education, the State Board of Education authorized the State Superintendent of Public Instruction to appoint a committee which was charged with the responsibility of evolving a plan to produce substantial improvements in public education, particularly in those localities where the needs are greatest.

Dr. William M. Turner, chairman of the Petersburg School Board and past president of the Virginia School Boards Association, was named chairman of the committee. Others appointed to the 15-member committee were school superintendents, school board members, State legislators, locally elected officials, and State Department of Education personnel.

The Turner Committee concentrated its attention on the following components of a quality-education program: staff and in-service education, curriculum and instruction, instructional aids and services, buildings, financial support, and evaluation. The committee presented its final report to the State Board of Education on April 28, 1967.

One of the key proposals contained in the report and approved by the State Board was the recommendation that visiting teams be assigned to evaluate programs for those school divisions which have the greatest educational needs. These teams will work with superintendents, school board members, and members of local governing bodies to formulate plans "for effecting substantial educational improvements."

The State Board also authorized the State Department of Education to act on other major proposals in the report which did not require additional appropriations during the current fiscal year. These included recommendations to:

- Give top priority to the evaluation of school divisions which have the greatest needs in terms of factors such as staff, high school offering, special education services, and/or plant facilities to effect school consolidation.

- Determine those localities which are in greatest need of fully certified teachers and give top priority to financial assistance for adequate in-service training.

- Give priority to applications for loans from the Literary Fund from those school divisions whose needs for improved physical facilities are greatest.

- Assist in planning and conducting special education programs on a regional basis in those localities which have the greatest need for such services.

- Provide for Statewide testing in grades 9 and 11 (Achievement and Scholastic Aptitude Tests) in addition to the required testing in grades 4, 7, and 8.

- Upgrade the standards for accreditation of high schools.

- Prepare standards for accrediting elementary schools and formulate legislation which, if enacted by the General Assembly, would empower the State Board to put into operation a plan for elementary school accreditation.

- Provide State assistance to upgrade qualifications and develop an appropriate salary scale for division superintendents.

- Provide State assistance to localities which will conduct kindergarten classes as part of their public school programs after July 1, 1968.

The State Board authorized the Turner Committee to continue its study of methods of financing education, particularly through the Basic School Aid Fund, and of the problem of consolidating school divisions.

REVISED STANDARDS FOR TEACHER CERTIFICATION

Revised standards for the certification of public school teachers in Virginia were adopted by the State Board of Education in August, 1966, and will become effective July 1, 1968.

The new requirements reflect the first major revisions in the teacher certification regulations since 1960. Following are some of the major changes adopted by the State Board:

- The Collegiate Professional Certificate will be issued initially for a period of five years from the date of qualification and will be renewable

for five years. (The requirements for the Graduate Professional Certificate are unchanged.)

- General education requirements were revised to provide that all applicants must possess a baccalaureate degree with a background of 48 semester hours in general education, including a minimum of 12 semester hours of humanities courses, 12 hours of social science, 12 hours of laboratory science and mathematics, and four hours of health and physical education. The remaining eight hours must be from the humanities, social science, and laboratory science and mathematics. (The revised regulations also recommend that all teachers take a course in speech and in basic economics to satisfy in part the general education requirements.)

- Not less than 120 clock hours of student teaching are required with a minimum of at least 90 clock hours given to actual teaching.

- For an endorsement in elementary education, grades 1-7, the applicant must complete a total of 60 semester hours in specific subjects, including a required course in American history and a course in basic economics.

- The revised regulations will increase the number of semester hours required for an endorsement in art, distributive education, driver education, English, English and speech, English and journalism, English and dramatics, foreign languages, health and physical education, history and social science, mathematics, music, science, and special education. (An applicant for endorsement in history, geography, or sociology, is required to complete a course in basic economics.)

- A new Industrial Education Certificate will be issued to qualified applicants in vocational industrial education. This certificate will be based in part on successful work experience and in part on college credit courses.

ACCREDITATION STUDY FOR ELEMENTARY SCHOOLS

One of the most important developments in the history of elementary education in Virginia has been the appointment of a committee to make a study and to develop standards for accrediting elementary schools.

The elementary accreditation committee—which was appointed in May, 1967, and is composed of public, private, and parochial school representatives and two college professors—was requested to develop appropriate standards for the elementary grades, kindergarten through grade seven, and to propose a system for accreditation.

The committee will give its attention to standards governing staffing, pupil-teacher ratio, plant facilities, libraries and other instructional aids, organization, and administration.

ACCREDITATION STUDY FOR SECONDARY SCHOOLS

A 17-member committee of educators was named in December, 1966, by the State Superintendent of Public Instruction to review and to revise and strengthen accreditation standards for secondary schools.

The standards, which cover junior and senior high schools, were last revised in 1960. The accreditation committee was requested to produce revisions that would represent "a substantial upgrading of public education in the secondary schools."

KINDERGARTEN EDUCATION

Steps were taken by the State Board and the State Department of Education to assist localities which plan to operate kindergarten programs as part of their public school systems after July 1, 1968.

Regulations governing the length of the school day, classroom size, and teacher endorsement for kindergarten classes were adopted by the State Board in February.

The kindergarten day was fixed at a minimum of five hours, including a lunch period. A minimum of 975 square feet was set for new kindergarten classrooms.

The State Board also approved a recommendation that the enrollment in kindergarten classrooms not exceed 25 pupils.

Under the newly adopted regulations, a teacher who holds a collegiate professional certificate in elementary education may receive an endorsement for teaching kindergarten by completing two three-hour courses, one in early childhood growth and development and the other in curriculum and instructional procedures for kindergarten children.

Because of a shortage of qualified kindergarten teachers, in-service regulations also were changed to permit enrollment, with State assistance, of persons whom school superintendents intend to hire as kindergarten teachers "at some future date." This means that prospective kindergarten teachers can take State-aid courses leading to certification before they are actually in service.

A 13-member committee of educators from schools and colleges in Virginia was appointed by the Superintendent of Public Instruction to develop a curriculum materials guide for kindergarten programs. The committee is studying such areas as (1) the philosophy behind kindergarten education; (2) the kindergarten program as it should exist; (3) the equipment and resources needed for a kindergarten program; and (4) evaluative procedures.

DIVISION OF ELEMENTARY AND SPECIAL EDUCATION

ELEMENTARY EDUCATION

Purpose and Scope

The major function of the Elementary Education Service is to provide leadership for the improvement of elementary education in Virginia in keeping with the law and established policies of the State Board of Education. A related function is that of assisting in improving the services of supervisory personnel and elementary school principals. Elementary Education Service personnel continually study all phases of elementary education in the State, help determine progress made in school divisions, identify problems in elementary education, and provide leadership and assistance in the development of the elementary school curriculum and in the preparation of curriculum materials for local school use.

The Elementary Education staff serves directly or indirectly all school personnel concerned with elementary education. In 1966-67, these included 120 elementary supervisors, 50 general supervisors, and 73 directors of instruction employed with State aid in 81 counties and 26 cities; 1,175 principals in straight elementary schools of five or more teachers, 45 principals in combined elementary and junior high schools, 90 principals in combined elementary and high schools; and 27,788 classroom teachers in 1,473 schools enrolling 682,223 pupils.

Accomplishments

Conferences. A Statewide supervisory personnel conference was held to emphasize the importance of supervision in the improvement of the total instructional program. Major features of the conference included addresses by outstanding authorities and group discussions. Discussion of supervision focused on its importance in curriculum development and in the use of instructional aids. The annual conference of elementary school principals emphasized such facets of kindergarten education as planning for a kindergarten, the nature and needs of the kindergarten child, and the kind of educational program needed to accomplish this goal.

Other annual conferences and workshops in which staff members participated were sponsored by the Virginia Education Association, the Southern Association of Colleges and Schools, the Association for Supervision and Curriculum Development Research Institute, the National Council for the Teachers of Mathematics, and the Southern States Work Conference.

Curriculum Development. A curriculum guide entitled *Elementary School Economics—A Tentative Guide for Teachers* was used by approximately 9,000 teachers during 1966-67. Classroom teachers who used the guide were asked to make comments and recommendations on evaluation forms included in the guide. The Elementary Education staff and a committee of classroom teachers and supervisors used these suggestions in revising the economics guide. The staff continued to work with the Mathematics Curriculum Committee on the development of material.

A committee of classroom teachers, supervisors, principals, superintendents, and college representatives was appointed by the State Superintendent of Public Instruction to work with the Elementary Education staff in the development of material for kindergarten teachers. The committee held five two-day meetings to prepare material for distribution to Virginia kindergarten teachers.

Accreditation of Elementary Schools. An 18-member committee was appointed by the State Superintendent of Public Instruction to develop standards for the accreditation of elementary schools in Virginia. Committee members include public school principals, supervisors, and superintendents; representatives of private and parochial schools; and college representatives.

Field Work. Staff members worked in 58 counties and 19 cities and participated in local workshops and conferences, met with superintendents, principals, and supervisors, and worked with Parent-Teacher Association groups. Staff members also participated in 13 regional meetings of supervisors, six regional meetings of elementary school principals, and two regional meetings of superintendents.

The Cooperative Program in Elementary Education of the Southern Association of Colleges and Schools. School systems in states served by the Southern Association of Colleges and Schools may participate in an elementary school improvement program by becoming members of the Cooperative Program in Elementary Education. Since 1960-61, two options have been available to members in the Cooperative Program: (1) affiliated membership with a continuous program of school improvement conducted in each individual school and (2) membership through accreditation. Affiliated membership of at least one year must precede application for membership through accreditation.

Virginia has a State Elementary Committee which is responsible for giving leadership in the State to the Southern Association's program of affiliation and accreditation of elementary schools. Members of the State Committee serve on the Association's Commission for Elementary Schools.

During the 1966-67 school year, 320 elementary schools held affiliated membership in the Cooperative Program in Elementary Education. Eleven city school divisions and six county divisions held division-wide affiliated membership. Also participating in the program were six individual public schools, five private, and six military reservation schools.

The Cooperative Program in Elementary Education has accredited 25 elementary schools since 1964, all of which have been in Fairfax County. In 1966-67, 42 elementary schools in the City of Richmond, 16 in Fairfax County, three on the Quantico Marine Base, and two in York County were engaged in a year of self-study leading to accreditation by the Association.

Title III, National Defense Education Act. During 1966-67, staff members reviewed project applications providing for the purchases of materials and equipment with funds available from Title III of the National Defense Education Act.

SPECIAL EDUCATION SERVICE

Overview

The primary responsibility of the Special Education Service is to provide programs and services for exceptional children, those children who deviate from the norm either physically, emotionally, mentally, or socially to such an extent that specialized programs are required in order that they may have the opportunity to develop maximally. A total of 32,653 children and youth were enrolled in special education programs in Virginia during 1966-67 as follows:

<i>Area of Exceptionality</i>	<i>Number of Pupils</i>
Physically Handicapped.....	995
Homebound.....	1,745
Blind.....	256
Partially Sighted.....	309
Hard of Hearing.....	1,590
Speech Handicapped.....	15,696
Emotionally Disturbed.....	1,151
Neurologically Impaired.....	441
Mentally Retarded.....	10,470
Educable 9,057	Trainable 1,413
	32,653

Accomplishments

Instruction for the Physically Handicapped. Children with crippling conditions are encouraged to attend regular classes whenever possible. Often this may be accomplished by slight modification of physical facilities. Some divisions have found it desirable, however, to operate schools especially designed and equipped for children with crippling conditions.

Homebound Instruction. This program is designed to meet the educational needs of children confined either temporarily or permanently to their homes because of illness, accident, or congenital deformity. During the past year, 1,745 children were served by this program.

Blind and Partially-Sighted Children. Through the utilization of federal funds and in cooperation with the Virginia Commission for the Visually Handicapped, 565 children were aided by the Special Education Service with apparatus, Braille, and/or large-print books.

Children with Speech and Hearing Impairments. Special programs for children who have speech and/or hearing problems were developed in 27 school divisions served by 115 speech therapists and three supervisors of speech and hearing programs.

In 63 school divisions where hearing tests were administered by audiometric technicians, speech therapists, and other trained persons, 89,501 children were tested; 4,564 children were found to have significant hearing impairments; and 2,345 children received medical follow-up for corrective purposes.

Emotionally Disturbed. These are children who, because of emotional or organic difficulties, are too distraught to adjust successfully to a regular classroom environment.

In addition to instruction provided in treatment centers and homes, 38 special classes were held for 1,151 children in Arlington, Fairfax, Chesterfield, and Henrico counties and in the cities of Lynchburg, Norfolk, Richmond, and Roanoke.

Neurologically Impaired. Fifteen classes in six school divisions provided services to children classified as being neurologically impaired. These are children who manifest severe learning problems usually accompanied by evidence of central nervous system impairment.

Children with Retarded Mental Development. This program continues to experience the greatest expansion in terms of classes and the number of children served. A total of 10,470 mentally retarded children were enrolled in 691 special classes in 54 counties and 28 cities throughout the State. The following statistics contrast the scope of the program in 1965-66 and 1966-67:

<i>Classification</i>	<i>Children</i>		<i>Classes</i>	
	<i>65-66</i>	<i>66-67</i>	<i>65-66</i>	<i>66-67</i>
Severely retarded (trainable).....	1,186	1,413	82	100
Moderately retarded (educable).....	7,009	9,057	460	591
Totals.....	8,195	10,470	542	691

Instruction of Children in Hospitals. Twenty-nine hospital teachers were paid from State funds to teach 1,854 children and youths in 13 hospitals, rehabilitation centers, and sanatoria as follows:

<i>Hospitals</i>	<i>Number of Persons Taught</i>	<i>Number Teachers</i>
Crippled Children's Hospital, Richmond.....	255	5
E. G. Williams Hospital, Richmond.....	28	1
Medical College of Virginia Hospital, Richmond.....	109	2
University of Virginia Hospital, Charlottesville.....	340	2
G. B. Johnston Memorial Hospital, Abingdon.....	138	1
Eastern State Hospital, Williamsburg (Children's Unit, Dunbar, for seriously emotionally disturbed).....	49	1
King's Daughters Hospital, Norfolk.....	66	1
Children's Rehabilitation Center, University of Virginia, Charlottesville.....	102	2
National Orthopedic and Rehabilitation Hospital, Arlington.....	31	1
Woodrow Wilson Rehabilitation Center, Fishersville.....	343	3
Roanoke Memorial Rehabilitation Center, Roanoke.....	67	1
<i>T. B. Sanatoria</i>		
Blue Ridge, Charlottesville.....	58	2
Catawba, Catawba.....	145	4
Piedmont, Burkeville.....	123	3
Total.....	1,854	29

Visiting Teacher Services—1966-67

There were 185 persons employed as visiting teachers in 83 school divisions throughout the State, with seven of these divisions employing visiting teachers for the first time. Reimbursement from State funds was made on 91 positions, and 94 positions were financed entirely by local divisions or as federal projects.

Significant statistical information taken from the 150 annual reports submitted by visiting teachers to the Special Education Service follows:

REFERRALS TO VISITING TEACHERS

33,506 new referrals for the current year.

8,140 referrals carried over from the previous year.

<i>Reason for Referral</i>	<i>Boys</i>	<i>Girls</i>
Child-Centered Problem.....	5,058	2,904
Home-Centered Problem.....	5,863	4,787
School-Centered Problem.....	3,125	1,729
Attendance Problem.....	7,904	5,712
Health Problem.....	2,346	2,201
Total—	41,646*	

An analysis of visiting teachers' annual reports indicates that the basic causes for referrals were the following:

<i>Basic Causes</i>	<i>Frequency</i>
Child-Centered Problem.....	9,011
Home-Centered Problem.....	15,640
School-Centered Problem.....	5,162
Attendance Problem.....	10,213
Health Problem.....	4,963
Total.....	44,989*

*The discrepancy in statistics can be explained by understanding that several factors may be involved in causes of problems whereas a referral will generally state only a single problem.

While growth is clearly evident, there continues to be need for additional trained personnel. Further, a review of the professional qualifications for the visiting teacher position becomes increasingly significant to meet changing roles of professional personnel providing specialized services in public schools.

Activities of Members of the Special Education Staff

One supervisor, who retired in February, and three assistant supervisors in the Special Education Service rendered the following services during 1966-67:

They made 171 visits for conferences with school personnel and with other services, for orientation conferences, for in-service education, for consultative services, and for evaluations; and they participated in 91 State, local, and national conferences, as well as staff conferences and individual interviews.

The staff gave leadership to the establishment of 13 new special education programs in the State; established an overall State Advisory Committee in conjunction with Title VI of Public Law 89-10; determined eligibility and awarded 66 fellowships and traineeships under funds provided under Public Law 85-926, as amended, in the amount of \$110,990; and inaugurated an evaluation of the instructional program as offered in hospitals, rehabilitation centers, and sanatoria by teachers employed by the State.

Special education personnel also worked in cooperation with vocational rehabilitation personnel in establishing work-study programs for educable retarded youth in secondary schools; evaluated credentials of applicants applying for positions as school psychologists in various school divisions; assisted in evaluating applications for scholarship funds which are provided for the education of aphasic and multiple-handicapped children; and disbursed State aid totaling \$2,919,891 to localities for services rendered to exceptional children. Total local expenditures reported, including reimbursement from local funds, amounted to \$6,270,829, which represented an increase of \$1,200,771 over the 1965-66 fiscal year.

Evidence of growth of the special education program is indicated by the increase in the number of special education classes throughout the State; the growth and availability of psychological services to school divisions; the expanded training program for special education in teacher-training institutions, coupled with the availability of scholarships and fellowship grants to upgrade the total special education program; and the use of federal funds under the Elementary and Secondary Education Act (P. L. 89-10) to provide impetus for closing gaps in State programs for the education of handicapped children.

VIRGINIA STATE SCHOOL, HAMPTON

At the 1906 session of the General Assembly, legislation established the Virginia State School at Hampton for the education of deaf and blind children.

The objectives of education at the school include the achievement of self-realization, the development of proper human relationships, the attainment of economic effort, and the assumption of civic responsibility.

The school consists of two departments, the Department for the Deaf and the Department for the Blind, and vocational training is offered in both. The high school is accredited by the Virginia State Board of Education and graduates of the two departments are eligible for advanced educational opportunities.

THE VIRGINIA SCHOOL FOR THE DEAF AND THE BLIND STAUNTON, VIRGINIA

The Virginia School for the Deaf and the Blind completed its 128th session with commencement exercises in June 1967. Dr. Douglas M. Montgomery, president of Blue Ridge Community College, was graduation speaker. Twenty-two students in the Department for the Deaf and eight in the Department for the Blind graduated with diplomas. Certificates were awarded to four deaf students and one blind student who completed their terminal year. Two of the deaf students qualified for Gallaudet College, and two of the blind graduates plan to attend college. Three deaf graduates barely missed qualifying for college and will return to Staunton for postgraduate study. Several graduates plan to attend business colleges and others secured jobs shortly after graduation.

The new dining room-kitchen facility for younger children was used for the first time when school opened in September 1966. Covered walkways connecting buildings on the old and new campuses were completed during the year. A dormitory which will house 96 older deaf girls and a dining room for older deaf students will be completed in November 1967. A dormitory for 64 young deaf boys is expected to be completed by February 1968.

The school continues to upgrade its professional staff and encourages teachers to improve themselves professionally. A number of teachers took special education courses at the University of Virginia and attended workshops.

DIVISION OF SECONDARY EDUCATION

The Division of Secondary Education is responsible for providing leadership to the public schools of Virginia in the area of secondary education. The staff of the Division renders supervisory and administrative services to local school divisions and assists them in developing and maintaining quality education in Virginia's high schools. Personnel of the Division cooperate with other divisions in the Department, with institutions of higher learning, and with the localities to upgrade the educational program in Virginia.

The primary concern of Division personnel is the improvement of instruction in academic subjects, the fine arts, health and physical education, and adult education. In carrying out these functions, the work is divided among nine different services: Adult Education; Art; English; Foreign Languages; Health, Physical Education, Safety and Recreation; History, Government, and Geography; Mathematics; Music; and Science. The Division also is responsible for supervising projects under Title III of the National Defense Education Act.

Staff members work with local school divisions to achieve specific objectives. Among these are the following: interpreting the policies of the State Board of Education; providing leadership in the development of the curriculum and the improvement of instruction; giving impetus to the continuous evaluation of secondary education; serving as a resource agency to assist in the study of specific local problems; providing consultative services; assisting in accreditation and licensing procedures; and working with professional personnel at every level of education in a united effort to improve secondary education in Virginia.

Supervisors and their assistants in each service perform a number of important duties, such as serving on evaluation committees, participating in State-wide conferences, arranging in-service opportunities for teachers, conducting surveys, addressing civic and educational groups, assisting in the development of library facilities, participating in regional and national efforts devoted to curriculum improvement, and conferring with representatives of school divisions throughout the State.

Reports were received during 1966-67 from 487 public high schools and 68 private high schools which provided work on the secondary school level.

In addition to the overall activities performed by the Division staff to promote the improvement of secondary education, accomplishments during the year included the following:

SUPERVISORY AND ADMINISTRATIVE RESPONSIBILITIES

Accreditation of High Schools. Accreditation standards are designed to provide general guidance for high schools in promoting better education for youth and better conditions which contribute to the living and learning opportunities for all students. During the 1966-67 school year, 470 public secondary schools (schools containing one or more of grades eight through 12) and 68 private secondary schools were accredited by the State Board of Education. Data processing was used to analyze the Preliminary Annual High and Junior High School Reports of all schools offering studies on the high school level.

Staff members visited 24 new public secondary schools and one new private secondary school that filed Preliminary Annual High or Junior High School

Reports for the first time. Seventeen previously accredited public secondary schools and one private secondary school were converted, consolidated, or discontinued for the 1966-67 school session.

A committee of educators from over the State was appointed by the Superintendent of Public Instruction to review the present standards for accrediting secondary schools and to make recommendations for revising the standards.

Conferences. Two conferences for secondary school principals were held in Richmond during the 1966-67 school session. The first Statewide conference for principals of intermediate, middle, and junior high schools was held on February 9-10, 1967. Emphasis was placed on the central theme, "Continuing Quality Education for the Intermediate Grades." Another Statewide conference, with the theme, "Let's Look at the Principal's Job," was held on June 19-21, 1967, for principals of all schools.

Statewide conferences for teachers and supervisory personnel also were conducted by the following services: Art; Foreign Languages; History, Government, and Geography; Mathematics; Music; and Science.

In addition to the Statewide conferences, staff members in the Division of Secondary Education participated in numerous preschool conferences and in meetings and study groups sponsored by school divisions or by district and regional groups.

State Aid for Employment of Supervising Principals for Twelve Months. Reimbursement totaling \$754,711.50 was distributed to 95 counties, 33 cities, and seven towns where 1,020 principals of elementary and secondary schools were employed during the summer months of 1966 on a 12-month basis.

The program is designed to help school divisions improve the quality of administration, operation, and supervision of the schools. Improved organization and promptness with which the work of the regular session is begun, better planning of the entire program, supervision of school activities carried on during the summer months, enriched school-community relations, and increased services of the schools to the students and communities are among the accomplishments attributed to this program.

High School Evaluation. Assistance was given by staff members of the Division of Secondary Education to 20 public secondary schools in their self-evaluation programs. Reviews of the self-evaluations and final appraisals were given by 20 visiting committees composed of 481 educators, including administrative and supervisory personnel from school divisions, classroom teachers, Department of Education personnel, and college faculty members.

The following high schools completed self-studies, and were evaluated during the 1966-67 school session: Arlington County—Washington-Lee High School, Wakefield High School; Charlotte County—Randolph-Henry High School; Chesapeake City—Crestwood High School; Colonial Heights City—Colonial Heights High School; Fairfax County—Fort Hunt High School; Falls Church City—George Mason Junior-Senior High School; Giles County—Narrows High School; Halifax County—Halifax County High School; Hampton City—Kecoughtan High School; Henrico County—Henrico High School; Newport News City—Huntington High School; Pittsylvania County—Chatham High School, Gretna High School, Dan River High School, Northside High School, Tunstall High School; Roanoke County—Northside High School; Smyth County—Chilhowie High School, Rich Valley High School.

Junior high schools and intermediate schools were evaluated for the first time during the 1966-67 session and involved 225 members of 20 visiting committees. The schools evaluated were: Arlington County—Gunston Junior High School, Jefferson Junior High School, Kenmore Junior High School, Stratford Junior High School, Swanson Junior High School, Williamsburg Junior High School; Fairfax County—William Cullen Bryant Intermediate School, James Fenimore Cooper Intermediate School, Robert Frost Intermediate School, Stephen Foster Intermediate School, Ellen Glasgow Intermediate School, Washington Irving Intermediate School, Luther Jackson Intermediate School, Sidney Lanier Intermediate School, Henry Wadsworth Longfellow Intermediate School, Edgar Allan Poe Intermediate School, Henry David Thoreau Intermediate School, Mark Twain Intermediate School, Walt Whitman Intermediate School, John Greenleaf Whittier Intermediate School.

High Schools Closed, Consolidated or Converted. During 1966-67 the following public high schools were closed, consolidated, or converted:

<i>Division</i>	<i>Name of School</i>	<i>Action Taken</i>
Augusta.....	Central Augusta.....	Converted to Beverly Manor Intermediate School
Clarke.....	Johnson-Williams.....	Converted to Clarke County Intermediate School
Lunenburg.....	Kenbridge and Victoria.....	Consolidated into Central High School
Montgomery.....	Christiansburg Institute.....	Closed
Patrick.....	Patrick Central.....	Closed
Prince George.....	J. E. J. Moore.....	Converted to Prince George Junior High School
Prince William.....	Jennie Dean.....	Converted to Jennie Dean Junior High School
Roanoke.....	Carver.....	Converted to Salem Intermediate School
Warren.....	Criser.....	Converted to Warren County Intermediate School
Bristol.....	Douglas.....	Closed
Covington.....	Watson.....	Closed
Staunton.....	Booker T. Washington.....	Closed
Virginia Beach.....	Virginia Beach.....	Converted to Virginia Beach Junior High School
Winchester.....	Douglas.....	Closed
Alexandria.....	Thomas Jefferson.....	Closed (for renovation)
State School.....	Mattaponi-Pamunkey Indian Reservation.....	Closed

Southern Association of Colleges and Schools. The primary function of the Southern Association of Colleges and Schools is to improve education through voluntary regional accreditation. The Association's Commission on Secondary Schools accredited 188 Virginia public and private secondary schools at the annual conference in Miami, Florida, in December 1966.

The Virginia Committee, composed of eight members and 11 associate members, operates within the Commission to provide leadership in the State for the Association's policies, to encourage and stimulate progress in member schools, to promote conditions which will enable member schools to meet the requirements of the Association, and to assist non-member schools in their efforts to attain membership.

The Supervisor of Secondary Education served as executive secretary of the Virginia Committee.

Twenty junior high schools and intermediate schools, which were evaluated for the first time during the 1966-67 school year, have applied for membership in the Association.

Title III, National Defense Education Act of 1958. The purpose of the National Defense Education Act of 1958 is "to provide substantial assistance in various forms to individuals, and to states and their subdivisions, in order to insure trained manpower of sufficient quality and quantity to meet the national defense needs of the United States." Title III of the act authorized matching grants of federal funds to the states to help equip laboratories and classrooms and to assist the states in expanding and improving their supervisory and related services in science, mathematics, and modern foreign languages. In 1964 the act was amended to include five additional subjects—civics, English, geography, history, and reading.

During 1966-67 Virginia participated in the NDEA, Title III, expanded program and operated for the second year under the revised plan, approved by the State Board of Education, May 28, 1965. An addendum to include the humanities and the arts under Section 12 of Public Law 89-209 became effective in Virginia December 28, 1966. Also in December 1966, the State Board of Education approved participation in the program provided by the Appalachian Regional Development Act of 1965, Public Law 89-4, Section 214.

For 1966-67, Virginia was allocated federal funds in the amounts of \$2,137,843 for the acquisition of equipment and/or materials and \$198,245 for the supervision and administration of the NDEA, Title III program. This was the largest allocation for any year during the existence of the program. A separate allotment of \$11,822 was provided for use in strengthening instruction in the humanities and the arts.

NDEA, Title III, project applications were received from 117 counties and cities in fiscal year 1967. Two school divisions received assistance in acquiring equipment and materials to improve instruction in the humanities and the arts. One school division received aid under the Appalachian Regional Development Act of 1965.

Federal reimbursements totaling \$1,783,425.15 from Title III funds were made to the local educational agencies for approved equipment and materials purchased under provisions of the National Defense Education Act of 1958, as amended. This sum included \$651,526.40 for equipment and materials for elementary schools and \$1,131,898.75 for secondary schools. Federal reimbursements under Title III in 1966-67 exceeded those in 1965-66 by \$315,667.25. This was the greatest increase for any single year that the program has been in operation. In addition, federal reimbursements of \$11,724.01 were made on approved projects under the National Foundation on the Arts and the Humanities Act of 1965. A supplementary reimbursement of \$5,509.15 was made under the Appalachian Regional Development Act of 1965.

Adult Education. The General Adult Education Program had 21,155 adults enrolled in 41 local school divisions; State funds provided 15 percent of the cost of instructors' salaries.

Staff members provided information about the General Educational Development Program for military and civilian personnel and scored the tests given by local school divisions. During the year 21,667 individual tests were administered in counties and cities and in the Department of Welfare and Institutions. Of the total number of persons tested, 3,601 took the complete battery of five tests and 1,627 persons took one or more individual tests. The number of persons tested during 1966-67 was 3,601, an increase of 598 persons over the number tested in 1965-66. A total of 1,885 persons qualified for the General Educational Development Certificate.

Under the Alien Program conducted in cooperation with the U. S. Department of Justice, 1,418 aliens were contacted, and information regarding naturalization procedures and educational opportunities was provided for 187 persons.

The Adult Education Program for Personal and Family Survival, which now has 668 qualified teachers in the State, offered 123 adult education classes last year and 3,542 adults completed the course. Since the Adult Education Service assumed supervisory responsibility for the Warden Service and Emergency Planning for Schools, 16 school divisions have had all of their teachers complete the Personal and Family Survival Course and 12 school divisions are in the process of completing the course; other divisions have completed plans to conduct the course during the coming year.

The Adult Basic Education Program, now under Title III of Public Law 89-750, was offered to 9,000 persons in 51 school divisions. A core curriculum, consisting of language arts and computational skills, forms the basis of the program. Designed to take the student through the eighth grade, the program also seeks to generate positive changes in self-worth, employability, and family membership.

ART

The art education program for Virginia students in kindergarten and grades one through 12 is administered through the Division of Secondary Education by a supervisor of art and two assistant supervisors. The addition of the assistants during the 1966-67 school year reflects significant growth and interest in art by school divisions throughout the State.

The State Department of Education, in cooperation with Richmond Professional Institute, sponsored a two-day Statewide spring conference for elementary and secondary teachers, art personnel, principals, supervisors and college art personnel. This conference was well attended and attracted art educators on every level throughout the State. In addition, a one-week Statewide workshop conference was held for elementary and secondary classroom teachers, art personnel, principals, and supervisors in June, 1967. This workshop was held at the Eastern Shore Branch of the University of Virginia at Wallops Island. As in the past, the workshop was designed to give participants creative training in art and art education. The Art Education Service also conducted workshops in school divisions throughout the State; assisted the School Libraries and Textbook Service in evaluating textbooks and general art books; and assisted the School Building Service in evaluating art rooms for new schools throughout the State.

A series of six television programs was produced by the art education staff to portray the value of art and art education in the life of the community. A committee, which was appointed to study and develop a new elementary art guide, will continue its work during 1967-68. Assistance was given to local school divisions as they developed projects involving art under provisions of Titles I and III of Public Law 89-10.

ENGLISH

In addition to the regular services of observation, evaluation, and consultation provided to schools during 1966-67, considerable attention was given to a variety of other activities. Chief among these were the initiation of a two-year pilot study for slow-learning pupils in English involving five representative schools, and the evaluation of textbooks for State adoption in language and composition, literature, speech, dramatic arts, and journalism.

In cooperation with other agencies, plans were developed for improving the project, the performing arts in Virginia Education. These plans resulted in establishment of a summer institute for teachers at Richmond Professional Institute.

English Service personnel also contributed to the 1970 revision of *Evaluative Criteria*, developed instructional units for mentally retarded pupils, and contributed to a national study of supervision of English and Reading.

Representatives of this Service also participated in the annual Conference on English Education, served on a committee of the National Council of Teachers of English, served on programs and committees of the Virginia Association of Teachers of English, and helped plan the 1967 conference of the Association of State English and Reading Specialists.

FOREIGN LANGUAGES

The number of modern foreign language teachers increased from 1,069 to 1,139, but the number of Latin teachers remained almost stable at 298.

Enrollments in foreign languages were as follows:

	<i>Level I</i>	<i>Level II</i>	<i>Level III</i>	<i>Level IV</i>	<i>Level V</i>	TOTAL
French.....	21,773	14,371	5,752	1,700	478	43,974
Spanish.....	18,944	11,321	4,251	808	127	35,451
Latin.....	8,595	6,366	1,503	471	51	16,986
German.....	2,738	1,665	656	144	10	5,213
Russian.....	200	98	41	339
Total.....						101,963

New textbooks were adopted in 1965-66. Reflected in the new modern language texts was a change of emphasis from the traditional reading and writing skills to comprehension, speaking, reading, and writing with applied linguistics as the basis for achieving these goals.

Also during the year work was begun on the production of a curriculum guide for foreign languages.

Emphasis was placed on pre-service and in-service education for foreign language teachers. Local and regional workshops were continued, and in some cases were lengthened to permit greater depth of study. The supervisors visited

a number of colleges to work with members of the foreign language departments on matters related to teacher training, and a workshop in undergraduate foreign language education was held for college personnel. An in-service program was conducted for local foreign language supervisors who requested that it become an annual event.

The foreign language conference, which was unusually successful this year, attracted a large number of teachers, and the program which was built around demonstration teaching was well received.

A pilot study in which several history courses were taught in a foreign language was nearing completion at the end of the fiscal year.

The greatest single need in the foreign language field in Virginia today and probably for a number of years to come is for more and better pre-service and in-service education. Current plans are directed toward continuing and improving existing programs and initiating new ones.

HEALTH, PHYSICAL EDUCATION, SAFETY, AND RECREATION

Health and physical education personnel are responsible for working in both elementary and secondary schools. The program, however, is administered through the Division of Secondary Education.

A summary of the health and physical fitness status and progress reports of pupils was compiled from information submitted to the State Department of Education and copies of this summary, which indicated definite improvement over last year, were distributed to all school divisions in September 1966.

The Annual State Conference for Health and Physical Education Teachers in Public Schools and Colleges was not held this year. Instead, Virginia was host to the Southern District of the American Association for Health, Physical Education, and Recreation (with Miss Frances Mays serving as its president). Approximately 1,200 representatives from 13 Southern states registered during the conference at the John Marshall Hotel, February 24-27, 1967.

Two one-week summer camps for high school girls were held at Camp Farrar, Virginia Beach, with 323 girls from 100 junior and senior high schools in attendance. The primary purpose of the camps is to meet the need for more women health and physical education teachers in Virginia schools by developing in high school girls an interest in the teaching profession.

The State guide, "Health Education—Grades I-VII," was reprinted, with some minor revisions, for distribution to all school divisions at the beginning of the 1967 school year.

A Lifetime Sports Education Project involving tennis, golf, and bowling has been planned for Virginia and North Carolina. A leadership training clinic will be conducted at the 4-H Educational Center, near Rocky Mount, Virginia, on September 21-23, 1967. This will be followed by approximately seven regional clinics in Virginia and 10 in North Carolina. The objective of the project is to train teachers to teach these "carry-over" sports as a part of the regular physical education offering.

An annual progress report was submitted to the President's Council on Physical Fitness.

Driver Education. College curriculum courses in safety and driver education were distributed to all teacher training institutions in the State. Courses included

general safety education, Driver Education—I (basic course), and Driver Education—II (advanced course).

The driver education program continued to show steady growth. During the school year, 23,040 pupils in 322 high schools completed the State-approved program for which reimbursement totaled \$744,218.14. Eight hundred thirty-six teachers were involved in teaching driver education and 461 automobiles were used.

More school divisions appear to be developing an interest in using multiple-car driving ranges and simulators for practice driving. At present, 40 schools are using driving ranges and 15 schools are using approved driving simulators. The use of driving ranges and simulators contributes to savings in time and money and also makes it possible for a larger percentage of eligible students to complete the standardized program.

The National Highway Safety Act of 1966, the purpose of which is to promote and expand safety on the highways, is expected to make a favorable impact on driver education in Virginia.

HISTORY, GOVERNMENT, AND GEOGRAPHY

A program of in-service education in basic economics for teachers of the seventh grade, for the courses in Virginia and United States History (11th grade), and Virginia and United States Government (12th grade), was conducted in cooperation with the Division of Elementary and Special Education, the Division of Teacher Education and Certification, and public institutions of higher education in the State.

Progress was made toward completion of a curriculum guide for the Virginia and United States history course.

Supervisory personnel of the Service also conducted a Statewide conference for teachers of history and geography; assisted school divisions in curriculum planning, selection of materials, and evaluation of student progress; cooperated with the School Libraries and Textbook Service in evaluating textbooks submitted for adoption by the State Board of Education; assisted in the administration of National Defense Education Act, Title III funds for improved instructional materials and equipment for history, civics, and geography; attended and participated in regional and national professional meetings and seminars related to the teaching of history, government, and geography; and, with various agencies and organizations such as the Senate Youth Program and Model General Assembly, cooperated in citizenship education projects.

A statistical analysis of the status of teaching in the fields of history, government, and geography was completed and the information was made available to interested individuals and agencies.

MATHEMATICS

The Mathematics Service assisted secondary school teachers and administrators, individually and in groups, in improving instructional techniques, selecting and using equipment and materials for mathematics classrooms and laboratories, and planning the content and sequence of mathematics course offerings. The Service also helped plan and coordinate mathematics institutes held in colleges in the State.

Several series of classes which concentrated on specific contemporary mathematics content and on teaching methods were held for elementary and secondary mathematics teachers. The Service sponsored workshops for parents to acquaint them with contemporary mathematics in elementary and secondary schools.

Staff members participated in project planning efforts of local school divisions as well as those of specific groups such as educational television personnel and State and regional mathematics organizations.

Personnel of the Service attended State, regional, and national mathematics conferences and, in many instances, participated in and/or assisted in planning the conferences.

Two specific accomplishments of the Service were: (1) a survey to determine the nature of freshman mathematics courses in Virginia colleges for the purpose of supplying information to secondary school mathematics curriculum planners; and (2) a Statewide conference for junior and senior high school mathematics teachers and supervisors.

MUSIC

During 1966-67, the number of professional personnel in this Service was expanded from one to three. This expansion made possible visits to 111 school divisions and permitted participation in an increased number of high school evaluations, teachers' workshops, and demonstration teaching programs.

A one-day meeting of State music supervisors, held in October 1966, proved to be one of the most successful activities of the office. The meeting provided the opportunity to share activities, interests, and concerns and also to bring to the attention of the supervisors State policies and information concerning ESEA (PL89-10).

A State Music Conference, which the Service sponsored in mid-January, 1967, drew approximately 275 participants representing public schools, colleges, and private schools. This was the largest number of participants in any similar music conference sponsored by this Service.

Records indicate that, for the first time, the number of music teachers employed in the State has exceeded 1,110.

The Virginia Music Camp offered opportunities for professional growth and stimulation to high school choral teachers, instrumental teachers, elementary classroom teachers, and music majors working at the elementary level. It is gratifying to note that of the 821 participants in this program, 177 were teachers; the others were high school pupils.

This Service maintains a professional library, and the increase in its use by teachers in the field is evidence of their efforts to update and improve course content and teaching procedures. This change indicates wide participation in music curricula revision in the State.

The Service participated in the planning sessions for music classes to be taught via educational television, and looks forward to seeing the results of the planning during the next school year.

It is gratifying to note the impact of educational activities sponsored by the Old Dominion Symphony Council. Approximately 50,000 children attended 50 concerts under this plan and the Council served 41 school divisions through four ETV programs.

SCIENCE

Enrollment in science courses in Virginia for the 1966-67 school session totaled 274,277 students in grades seven through twelve. The offerings in grades seven, eight, and nine show a decrease in general science courses and an increase in specialized courses for these grades.

Course offerings in science are increasing in most school divisions; and five new offerings, which were not previously taught anywhere in the State, have appeared in certain divisions.

The number of divisions with planetariums for supplementary instruction has increased from three in 1965-66 to six during the past fiscal year, and others are being planned. Construction of greenhouses increased and a general improvement of science facilities was noted in the State.

The Fourth Annual State Science Teachers Conference was held in October 1966, in Staunton with approximately 600 teachers and administrators attending. Judging from the response of teachers who attended, the conference was very successful.

In-service sessions and workshops with emphasis on laboratory techniques were conducted by the Science Service staff. At least eight school divisions have had science teachers in such sessions and others have participated in programs of importance though not directly connected with the Science Service.

The Service was also successful in selecting participants for the Virginia Flight Seminar for Youth and the National Youth Science Camp in West Virginia. The Spacemobile, which is operated by the National Aeronautics and Space Administration, visited a large number of school divisions.

The staff worked on several projects which were designed to promote safety, conservation, and instructional improvement. A bulletin entitled *Pin Up for Safety* and a booklet entitled *Natural Areas in School Design and Instruction* were printed and distributed to all school divisions.

The 1966 summer school science program enrolled 5,331 high school students.

A Science Curriculum Study Committee was appointed during the year to assist the State Department of Education in evaluating and reviewing the secondary science program. The committee will prepare a curriculum guide for science teachers.

DIVISION OF SPECIAL SERVICES

The Division of Special Services serves the public schools in the areas of guidance and testing, school buildings, school plant surveys, pupil transportation, educational television, teaching materials, film production, and school libraries and textbooks. Its scope of services affects many phases of the public school program. During the 1966-67 school year, the Division conducted a program of testing, study, and visitation:

1. To discover and promote practices and procedures which may be used to improve instruction and guidance;
2. To assist localities by making school plant surveys and in planning and constructing efficient and economical school buildings;
3. To aid localities in providing safe, adequate, and efficient pupil transportation systems; and
4. To encourage and assist localities to enrich children's learning experiences through the provision of educational television, adequate library services, and materials, including textbooks and a variety of audio-visual materials and equipment.

Reports of the activities of the Services in the Division of Special Services during the 1966-67 school year follow in this order: Guidance and Testing, School Plant Surveys, School Buildings, Pupil Transportation, Educational Television, Bureau of Teaching Materials, Film Production, and Libraries and Textbooks.

GUIDANCE AND TESTING

Purpose and Scope

The Guidance and Testing Service assists local school personnel in extending and improving guidance services in the public schools of Virginia.

In scope, the activities of the Guidance and Testing Service include visiting and consulting with local school personnel; participating in conferences, institutes, and workshops; evaluating guidance services in local schools; working with community groups and agencies interested in guidance; and developing and providing certain materials for local schools.

Guidance and testing personnel also assist school divisions in accomplishing established objectives:

1. Improving the guidance and testing services and extending these services to all pupils;
2. Employing qualified guidance personnel to render guidance services;
3. Assisting each pupil in understanding himself—his strengths, limitations, interests, and needs;
4. Assisting each pupil in making a wise choice of his program of study and in planning for further education beyond high school;
5. Assisting pupils in making vocational choices compatible with their interests and abilities;
6. Assisting pupils in developing their potentialities, achieving worthwhile goals, and assuming responsibility for their decisions and actions;

7. Providing information to parents so that decisions made by parents and pupils will be based on a realistic understanding of the pupil's abilities, and interests and the requirements involved in his educational and vocational goals;
8. Providing in-service training for the professional growth of staff members; and
9. Evaluating the outcome of guidance activities to determine effectiveness and to discover additional ways of improving these services.

Activities and Accomplishments

During the school year, members of the Guidance staff visited every school division in the State and worked with individuals and groups interested in guidance. The staff participated in numerous conferences and meetings, such as pre-school and other local conferences for teachers and counselors; district guidance meetings; meetings with counselor education classes, local directors of testing, and civic groups; annual guidance conferences of counselor education institutions; as well as State conferences with division superintendents, secondary and elementary principals, supervisors, and visiting teachers. The staff also participated in meetings and conferences sponsored by the following professional associations: Virginia Education Association, American Vocational Association, American Personnel and Guidance Association, Virginia Personnel and Guidance Association, Virginia Counselor Educators, College Admissions Officers, Virginia Association of Collegiate Registrars and Admissions Officers, Central Educational Television Committee, the Governor's Conference on Education in Virginia, and the United States Office of Education.

A State-sponsored guidance institute was held in June 1967 to help counselors improve their effectiveness in the area of vocational guidance. The institute was made possible by an appropriation of the 1966 General Assembly which provided financial assistance to counselors attending the institute.

Members of the Guidance staff and the Vocational Education staff of the State Department of Education supervised the institute, which was attended by 162 principals and counselors. This institute was conducted in addition to the guidance courses offered during regular and summer sessions by institutions of higher education.

By June 30, 1967, more than 1,300 counselors met or exceeded the minimum qualifications adopted by the State Board of Education.

During the 1966-67 school year, guidance and testing materials were distributed to all secondary schools. These materials included: *The National Directory of Schools and Vocations*, 1967 Edition; *The Encyclopedia of Careers and Vocational Guidance*, 1967 Edition; *The Occupational Outlook Report Series*, 1966-67 Edition; *Financial Assistance to Attend Virginia Colleges and Universities*, 1966 Edition; two issues of *Guidance News and Views*; *Library Books With Implications for Guidance*, Grades K-3, 4-6, 10-12. *Library Books With Implications for Guidance*, Grades 7-9, was prepared and sent last year. Guidance materials sent to each county and city school system included five guidance filmstrips with long-playing records and a set of 50 interview vocational guidance tapes.

Pilot programs in guidance—supported by Title V-A of the National Defense Education Act—are in operation in five elementary schools in different areas of the State. Three of these programs have been in operation two years; the other two have been in operation one year.

Reimbursement to school divisions for guidance personnel was made through an appropriation of \$1,385,085 from the General Assembly of Virginia and \$420,000 from the National Defense Education Act, Title V-A. Reimbursement was made to school divisions at the rate of 60 percent of the State Minimum Salary Scale per position for 500 counselors. A total of 96 counties and 33 cities received funds totaling \$1,805,085. Counselors in these positions devoted four or more class periods per day to counseling.

The Statewide Testing Program continues to place emphasis upon the use of tests for the improvement of guidance and instruction.

The following tests were administered to approximately 593,720 pupils in 1966-1967. An asterisk indicates those grades in which testing was optional.

- *Grade 1—Metropolitan Readiness Tests, Form R
These tests involved approximately 87,371 pupils.
- *Grade 2—Kuhlmann-Anderson Intelligence Tests, Form B
These tests involved approximately 70,519 pupils.
- *Grade 3—Kuhlmann-Anderson Intelligence Tests, Form C
These tests involved approximately 16,305 pupils.
- Grade 4—The Lorge-Thorndike Intelligence Tests, Level 3A
SRA Achievement Series, Form C
These tests involved approximately 88,247 pupils.
- *Grade 5—The Lorge-Thorndike Intelligence Tests, Level 3A
These tests involved approximately 17,627 pupils.
- *Grade 6—The Lorge-Thorndike Intelligence Tests, Level 3A
These tests involved approximately 29,599 pupils.
- Grade 7—California Tests of Mental Maturity, Junior High Level
Iowa Silent Reading Tests, Form DM
These tests involved approximately 81,830 pupils.
- Grade 8—Differential Aptitude Tests, Battery, Form L
These tests involved approximately 80,137 pupils.
- Grade 9—School and College Ability Tests, Form 3A
Sequential Tests of Educational Progress, Form 3A
These tests involved approximately 64,555 pupils.
- Grades 10*, 11, 12*—School and College Ability Tests, Form 2A
Sequential Tests of Educational Progress, Form 2A
These tests involved approximately 62,949 pupils.

All answer sheets for grades four through 12 were machine-scored by test scoring agencies and the results were sent to the divisions and to the Guidance and Testing Service of the State Department of Education. Tests for grades one, two, and three were scored locally and duplicate copies of class reports were sent to the Department.

SCHOOL PLANT SURVEYS

Purpose and Scope

The School Plant Surveys Service was established in February 1967 with the appointment of an assistant supervisor of school plant surveys.

School plant surveys have been conducted by the Department for many years but, prior to the establishment of the School Plant Surveys Service, no member of the staff was available to devote full time to this work. The creation of the School Plant Surveys Service and the appointment of an assistant supervisor enabled the State Department of Education to provide more prompt and effective service to the localities in the study and evaluation of school plant needs.

The major functions of this Service are to organize and direct the work of School Plant Survey Committees, to be responsible for the preparation of the reports of the Survey Committees, to work with the local school divisions in implementing proposed building programs, to aid in the development of educational specifications, and to work with architects in interpreting the specifications.

Accomplishments

During the 1966-67 school year comprehensive school plant surveys were made in the cities of Covington, Franklin, and Richmond and in the counties of Nelson, Franklin, Rockingham, Russell, Halifax, Smyth, Nansemond, Greene, and Nottoway. In addition, limited studies of school plant needs were made in Colonial Beach, West Point, Buchanan County, Powhatan County, Lancaster County, Scott County, and Colonial Heights. These studies ranged from site evaluations to school plant needs in certain areas of the school division.

Thirty-one professional persons helped to conduct these surveys. Fifteen participants were staff members of the State Department of Education; 13 were superintendents of school divisions; four were college professors; one was director of instruction in a local school division; and two were retired division superintendents.

SCHOOL BUILDINGS SERVICE

Purpose and Scope

The functions of the School Buildings Service are:

1. To review and approve plans and specifications for school buildings.

Section 22-152 of the Code of Virginia and regulations of the State Board of Education stipulate that the plans and specifications for all public school buildings, including additions and major alterations, shall be approved by the Superintendent of Public Instruction.

The *School Planning Manual*, prepared at the direction of the State Board of Education, contains regulations governing the planning and construction of school buildings in Virginia. This manual, which is made available to local school authorities and to architects and engineers, provides the basis for the review and approval of plans by the School Buildings Service.

2. To assist local school authorities in planning functional school plants.

Members of the staff of the School Buildings Service assist local school authorities in the study of building needs by analyzing proposed educational programs, population trends, enrollment patterns, and the

adequacy of facilities and sites. Planning conferences are held with division superintendents, architects, and engineers. Programs for each new school and addition are reviewed in terms of current trends in school offering, size, and organization.

Preliminary plans are studied to obtain the best possible relationships of instructional spaces, services, housekeeping, safety, comfort, and economy, which are consistent with the site and available funds. Final working drawings are reviewed for fire safety, planning and equipment details, construction, mechanical equipment, and adequacy of contract provisions.

3. To maintain school plant records.

Plans and specifications and cost data are on file for all school plants constructed in Virginia since 1948. A comprehensive but incomplete file is maintained for earlier schools.

A new school plant inventory and reporting system is being developed through the use of automatic data processing equipment. This system will provide current information on school plant needs, cost, maintenance, and efficiency.

4. To suggest changes in school building regulations.

Studies are made at the suggestion of the Governor's Advisory Research Committee in an attempt to keep school building regulations up to date and in line with current educational developments. These studies involve reviews of information on building design, equipment, and construction, and on research related to school plant planning.

Activities and Accomplishments

During the 1966-67 year plans and specifications for 151 school construction projects were approved as follows:

<i>Type School</i>	<i>New Schools</i>			<i>Additions</i>		
	<i>County</i>	<i>City</i>	<i>Total</i>	<i>County</i>	<i>City</i>	<i>Total</i>
Elementary.....	28	8	36	44	18	62

High, Senior High.....	7	3	10	26	6	32
Vocational.....	1	2	3
Totals.....	37	14	51	72	28	100

Members of the School Buildings Service participated in School Plant Surveys in several counties and cities. Twenty-eight visits were made to school divisions to assist with planning and construction problems.

A survey of school plant needs was made for the Committee on Raising the Level of Public Education in Virginia.

Recommendations for kindergarten facilities were developed in cooperation with the Division of Elementary Education.

A plan file of available models of prefabricated classrooms on the market in Virginia was initiated.

PUPIL TRANSPORTATION

Purpose and Scope

The major purpose of the Pupil Transportation Service is to promote the safe transportation of pupils to and from public schools. More than 58 percent of the pupils attending public schools in the State are transported in school buses. The number of pupils has been increasing at an annual rate of approximately three percent. Specifications for buses are established to provide maximum safety for pupils, as well as economy of operation. Greater pupil safety is also provided by the careful selection and proper training of school bus drivers. A good transportation system must be adequate, efficient, and economical. Such a system has the following characteristics:

1. Sufficient buses of a type which will provide reasonable comfort, prevent overcrowding, and serve pupils and schools within reasonable time limits.
2. Bus routes which permit pupils to travel as directly as possible to and from school and routes planned to obtain maximum use of the buses, with minimum mileage and minimum waiting periods at schools.
3. The use of school buses that are properly designed, with provisions for a good preventive maintenance program and instruction of drivers in the care of equipment.

All school buses are inspected each year by representatives of this Service. In addition, monthly inspections by competent mechanics are required. This procedure is intended to insure that all buses meet all requirements and that they are maintained in a safe operating condition. Whenever an inspection indicated a need for corrections, subsequent reports showed that the deficiency had been remedied.

Each year throughout the State meetings with school bus drivers are held to discuss the many phases of school bus transportation. Requirements which must be met to qualify as a school bus driver are explained and safe transportation of pupils, observance of State laws, regulations of the State Board of Education, local regulations, and safe-driving practices are emphasized in these meetings.

An adequate program of preventive maintenance is stressed as a means for providing safe and economical transportation. Experience has proved the value of this program. The importance of properly-designed facilities and the necessity for good mechanics are emphasized for efficient operation. Plans and specifications for facilities and equipment have been used by local school officials to provide many well-equipped school bus repair shops. Visits to shops, discussions of maintenance problems with mechanics, and recommendations for better methods and practices have contributed to an improved maintenance program.

Surveys of transportation systems are made upon request. Maps showing recommended bus routes are prepared, presented, and explained to school officials. Such transportation surveys involve a careful analysis of the data obtained from the school system under study and the preparation of a spot map, which shows where all pupils board buses. Routes are planned to enable buses to operate at maximum capacity with time and distance at the minimum.

Accomplishments

Safety meetings, which were attended by school bus drivers, substitute drivers, mechanics, safety patrols, superintendents, law enforcement agents, and

others connected with pupil transportation, were held in school divisions throughout the State.

During 1966-67 the number of buses in operation increased by 212; there was a gain of 17,285 in the number of pupils transported; and 1,476,700 more miles were traveled to transport pupils.

From these figures, and those for the past five years given in the table below, it will be noted that the number of children transported, the number of buses operated, and the number of miles traveled have continued to rise. In spite of higher costs for parts, salaries, and other items, there has been relatively little increase in the cost per pupil and per mile for this service.

TABLE 11—GROWTH IN PUPIL TRANSPORTATION—1962-67

YEAR	Number Pupils Transported	Number Buses	Number Miles	Average Number Pupils Per Bus Per Day	Average Number Miles Per Bus Per Day	Cost Per Pupil	Cost Per Mile	Cost of Operation Less Gas Tax
1962-63	486,933	5,258	45,168,896	93	48	\$ 21 60	\$.233	\$10,515,411 35
1963-64	505,261	5,496	46,678,744	92	47	22 18	.235	11,205,593 24
1964-65	524,857	5,769	48,346,744	91	47	22 96	.249	12,050,784 68
1965-66	538,544	5,945	49,347,492	91	46	23 76	.259	12,796,362 84
1966-67	555,829	6,157	50,824,192	90	46	25 93	.284	14,410,405 47

During the year, some school divisions were aided in routing school buses. Assistance was given to school building survey committees, and a member of the Service served on some of these committees.

Twenty school divisions lowered their per unit cost of operation and 15 divisions reduced their total net cost of operation for the year. This may be attributed largely to improved maintenance programs and better planned bus routes.

The number of buses, classified according to type of ownership and operation, may be seen from the following table:

TABLE 12—NUMBER OF BUSES OPERATED ANNUALLY—1962-67

YEAR	Number of Publicly Owned Buses	Number of Privately Owned Buses

THE EDUCATIONAL TELEVISION SERVICE**Purpose and Scope**

The functions of the Educational Television Service are as follows:

1. To administer State funds to school divisions for the support of educational television in accordance with regulations of the State Board of Education.

The 1966 session of the General Assembly appropriated \$1,000,000 for the 1966-68 biennium to assist localities utilizing ETV. This fund was distributed to counties and cities on a 50-50 matching basis not to exceed \$1.00 in State funds per pupil in membership in those schools using educational television on a systematic basis as an integral part of the school program.

2. To cooperate with other agencies and organizations within the State which are concerned with the development and operation of educational television.

Every effort is made to maintain a close working relationship with all agencies and organizations, both official and unofficial, that are concerned with the development and use of ETV in the State, including the Virginia Advisory Council on Educational Television, the educational directors of ETV stations, and local groups that seek to improve educational programs through the use of educational television. This relationship enables the Department to keep abreast of developments and programs and to identify areas in which it can render assistance.

3. To work with school divisions in developing more effective use of educational television.

The Educational Television Service:

- (a) Assists local school divisions in planning and conducting workshops, short courses, and seminars that develop knowledge and skills for the effective use of television;
 - (b) Assists in planning and conducting demonstrations, seminars, and workshops for prospective studio teachers;
 - (c) Develops local leadership by working with personnel responsible for encouraging and improving the use of television in local school systems.
4. Encourages institutions of higher education in the development of programs for training teachers in the use of educational television.

During the period of professional preparation, student teachers should become skilled in the teaching media, materials, and methodology pertaining to educational television. Such preparation enables the "receiving" teacher to play her supporting role more effectively.

5. Coordinates activities related to instructional television in the public schools.

The Department encourages the exchange of information and services among the ETV stations. The exchange of video-tapes, for example, reduces duplication of effort and allows for specialization by the stations in the production of high quality programs.

6. Provides information concerning developments and activities related to instructional television in Virginia and in other states.

Many inquiries concerning ETV in Virginia and in other states come to the Department. The ETV Service has developed library resources which enable it to provide a centralized information service for ETV personnel and for other interested persons and groups.

Activities

The ETV staff engaged in the following activities during the 1966-67 school year:

1. Prepared several articles on educational television, including a status report on the broadcast and closed-circuit facilities in the Commonwealth, which were published in the State Department Quarterly "Public Education in Virginia."
2. Worked with teachers and administrators in pre-school conferences on techniques for the utilization of instructional television programs.
3. Administered the fund appropriated by the 1966 session of the General Assembly for reimbursing schools using instructional television programs. A total of \$334,091.05 was paid to school divisions during the 1966-67 school year.
4. Organized and conducted a meeting involving the professional staff of the State Department of Education and the personnel from the five broadcast ETV stations which serve the State. The purpose of this meeting was to acquaint Department personnel with what is being done in the field of ETV.
5. Prepared a handbook entitled "Instructional Television—A Utilization Guide for Teachers and Administrators." A total of 40,000 copies were distributed to educators throughout the Commonwealth. Complimentary copies were sent to all Chief State School Officers in the nation. Fifteen states have expressed an interest in using this guide.

BUREAU OF TEACHING MATERIALS

Purpose and Scope

The major purpose of the State Bureau of Teaching Materials and of the four Regional Bureaus located at Longwood College, Madison College, Radford College, and the University of Virginia is to improve instruction through the effective use of teaching materials.

The following services are provided by the State and regional bureaus:

1. The distribution of educational motion pictures to: public schools and State-supported colleges; private degree colleges engaged in training teachers (by special contract); State Department of Health, county and city health departments; State and county agriculture agencies; parent-teacher associations; and other State agencies.
2. The provision of consultative services to local school divisions in the selection of various kinds of teaching materials.

3. The preparation of listings of filmstrips, slides, and recordings for purchase with State matching funds provided through the School Libraries and Textbooks Service.
4. The evaluation of educational motion pictures for purchase by the State and Regional Bureaus of Teaching Materials and by local school divisions.
5. The provision of assistance in the pre-service and in-service training of supervisors and teachers in the use of teaching materials.

Accomplishments

The following accomplishments were realized during the 1966-67 school year.

Distribution of Educational Motion Pictures. A total of 371,086 educational motion pictures were booked from State, regional, and division teaching materials centers. This was a gain of 50,427 over 1965-66 bookings.

The number of prints of educational motion pictures available from State, regional, and division teaching materials centers has increased to 45,022, a gain of 4,717 over the previous year.

Publications. The revised 1966 bulletin "Educational Motion Pictures for Virginia Public Schools" was distributed in sufficient quantity to make it readily available to teachers wishing to use films. This bulletin included approximately 3,100 titles.

Visits to Schools. The professional staff visited 108 schools in 55 school divisions. The professional staff attended and participated in 18 conferences and workshops.

Meeting of Regional Directors. The annual meeting of the directors of the regional bureaus was held in May at the State Bureau of Teaching Materials. At this meeting policies and problems were discussed and plans were made for the operation of the bureaus for the 1967-68 school year.

Evaluation of Materials. During the year the Department of Education's professional staff previewed 708 educational motion pictures. The staff previewed and recommended for the library and Title II lists 1,073 filmstrips, 477 transparencies, 50 flat pictures, and a number of maps and globes.

Electronic Inspection Machines for Regional Bureaus. An electronic inspection machine was purchased for each of the four regional bureaus. Films are being sent to schools in better condition since these machines have been in use.

FILM PRODUCTION SERVICE

Purpose and Scope

The Film Production Service produces educational motion pictures and filmstrips for use in the public schools of the State. It also produces films for other State agencies.

The Film Production Service has the supervisory and technical staff to produce 16mm motion pictures in sound and color, as well as filmstrips, color slides, tape recordings, and other visual aids of professional quality.

Accomplishments

During the 1966-67 school year, the following films were completed:

SCOPE OF CONFIDENCE: 14 minutes, color. The responsibilities of the Virginia Department of Agriculture and Commerce are explained, with an emphasis on quality control. Many typical products are covered, with Department of Agriculture inspection and grading shown at all levels from the farm to the consumer. The film also illustrates how the agriculture industry has expanded to include transportation, processing, packaging, and marketing.

WILD ANIMALS OF VIRGINIA: 25 minutes, color. This film shows the habits and habitats of 16 wild animals that are native to Virginia. The animals are the chipmunk, squirrel, groundhog, beaver, muskrat, mink, otter, elk, deer, boar, bobcat, opossum, fox, rabbit, raccoon, and skunk.

WINTER WATCHMAN: This film on snow removal procedures was made for the State Highway Department.

FORESTRY FILMSTRIPS: Four color filmstrips were completed in a series on forestry for the Vocational Agriculture Service of the Department of Education.

GEOGRAPHY FILMSTRIPS: Three filmstrips on Virginia geography were prepared for use in the fourth grade. These filmstrips will enrich the textbook used in this grade.

FACING UP: This color slide presentation on education was produced in cooperation with the Governor's Office for use at the Governor's Conference on Education and regional conferences that followed.

Current Activities

Work is now in progress on the following films:

PUBLIC HEALTH NURSING: This film, which is being prepared for the Virginia Department of Health, has been photographed and edited. It should be completed in 1968.

SKILLS IN PHYSICAL EDUCATION: This film is designed to assist teachers in planning programs that enable pupils to acquire desirable skills in physical education. It will be completed in 1968.

REHABILITATION: This film is being produced for the State Department of Vocational Rehabilitation. The script has been completed.

EDUCATIONAL TELEVISION IN VIRGINIA PUBLIC SCHOOLS: This film has been approved for production and will illustrate the key role of television in public education in Virginia.

GEOGRAPHY FILMSTRIPS: This series consists of seven filmstrips, three of which have been completed. Photography continues on the other four.

Film Distribution

Six hundred and nine prints of films produced by the Film Production Service and 3,220 filmstrips were sold to the public schools of Virginia during the year. More than 80 films were rented for out-of-state use.

In its tourist promotion program, the Virginia Department of Conservation and Economic Development is circulating more than 100 prints of these films throughout the United States.

LIBRARIES AND TEXTBOOKS SERVICE

Purpose and Scope

The School Libraries and Textbooks Service assists local school divisions in improving the quality of library services in the public schools of the State. Guidance and leadership are provided by:

1. Offering supervisory and consultative service through visitation and correspondence;
2. Assisting in the establishment of library programs in new schools;
3. Preparing and distributing lists of approved teaching materials, bulletins, and memoranda;
4. Maintaining a professional library and a collection of juvenile literature to serve educational personnel;
5. Distributing State-aid funds for the purchase of library materials and processing State-aid library orders;
6. Administering the textbook program by distributing funds to school divisions operating free or rental textbook systems and coordinating the State program for the adoption of basic textbooks;
7. Administering the federal program for acquiring library resources, textbooks, and other instructional materials under Title II of Public Law 89-10; and
8. Reviewing library layouts for new schools.

Accomplishments

School Library Development Fund. The School Library Development Fund provides help to localities for the purchase of materials for new school libraries. Established in 1964, the program provides \$60 for every 40 pupils enrolled in eligible schools. During the past school year, grants were made to 72 schools in 47 school divisions. State funds of \$44,240 were matched with \$22,120 in local funds. Orders totaling \$66,360 were placed with publishers.

Books Reviewed for State List. During 1966, 4,500 books were reviewed by members of the Elementary Materials Committee, the High School Materials Committee, and members of the staff of the Department of Education. More

than 100 school librarians assisted in this work. The State Board of Education approved the addition of 3,799 books to the 1967 State-aid purchase list.

Professional Library Collection Available to Educational Personnel. The professional library of the State Department of Education continued to lend materials to school personnel throughout the State and to the staff of the Department. The library subscribes to 124 magazines of professional interest which are available to staff members of the Department.

Book Exhibits. The School Libraries and Textbooks Service maintains a collection of juvenile books which are approved by the State Board of Education for use in Virginia public schools. These books are available for use by school personnel and portions of the collection are used as exhibits to aid teachers, librarians, and parents in the selection of books for purchase. Exhibits were used in four school divisions during the spring of 1967.

Certified Librarians. During the 1966-67 school year, Virginia public schools employed 968 librarians with teaching certificates endorsed for library science. Of this number 503 were employed in 419 secondary schools, 428 in 518 elementary schools, 25 in supervisory positions, and 12 in central cataloging or county libraries.

Savings in State-Aid Funds Through Central Purchasing System. During 1966-67 quarterly service discounts of \$126,659 were refunded by publishers and dealers to the Treasurer of Virginia on State-aid orders totaling \$1,186,672. This amount was converted into \$60 State-aid units, making possible a mid-year allotment of units for additional purchases of library materials.

Textbook Adoptions. In December 1966 the State Board of Education adopted textbooks in the following subject fields: elementary language and grammar, history, and geography; and secondary English, history, civics, economics, sociology, and foreign languages. These textbooks will be used in the public schools during the period from July 1967 through June 1973.

Free and Rental Textbook Systems. The General Assembly at its 1966 session appropriated funds to be used to reimburse localities provided free or rental textbook systems at the rate of \$2.00 per pupil enrolled in those localities. During the 1966-67 school year 20 school divisions operated free textbook systems and 73 divisions operated rental textbook systems as shown below:

FREE TEXTBOOK SYSTEM		RENTAL TEXTBOOK SYSTEM	
<i>Counties and Cities</i>	<i>Grades Included</i>	<i>Counties and Cities</i>	<i>Grades Included</i>
9	1-12	43	1-12
10	1-7	24	1-7 or 1-8
1	1-9	6	7-12 or 8-12

Reimbursement of State funds was made as follows:

\$ 671,702—	for free text book systems
652,744—	for rental textbook systems
<hr/>	
\$1,324,446	

Operation of Title II of Public Law 89-10. During 1966-67, Virginia received \$2,132,269 under Title II of Public Law 89-10 for the acquisition of school library resources, textbooks, and other printed and published instructional materials for the use of children and teachers in public and private elementary and secondary schools. This program was administered by the School Libraries and Textbooks Service.

School Libraries Surveyed. At the request of the division superintendent, the School Libraries and Textbook Service conducted a survey of the school library program in Accomack County.

DIVISION OF VOCATIONAL EDUCATION

The Division of Vocational Education serves school divisions by developing an effective vocational program as an integral part of the total curriculum in the public schools. The Division has designed programs for persons attending high school; for those who have completed or left high school and who are available for full-time study in preparation for entering the labor market; for those who have already entered the labor market, but need training or retraining; and for those who have socio-economic or other handicaps which prevent them from participating in the regular vocational program.

In the years ahead, it is expected that employers will require more specialized training for a higher percentage of their workers. Greater flexibility in vocational education offerings will provide training for a wider range of occupations in keeping with labor market demands and scientific and technological developments.

Reports of the activities of the Services of the Division of Vocational Education for the fiscal year 1966-67 follow in this order: Vocational Agriculture, Business Education, Distributive Education, Home Economics Education, Industrial Education, Manpower Training, School Lunch, Veterans Education, and Construction of Vocational Facilities.

AGRICULTURAL EDUCATION

The Agricultural Education Service leads the development and improvement of all phases of vocational education in agriculture, including programs for high school students and young and adult farmers. The general aim of these programs is to provide basic instruction in agricultural occupations and to develop needed agricultural competencies. Therefore, the primary function of the Service is to assist school administrators and teachers in developing and improving the instructional program in agricultural education based on the needs of students. Assistance is given by the staff through (a) observation, (b) discussion, (c) on-farm or job instruction, (d) evaluation of local programs, (e) group conferences, (f) in-service training programs, and (g) correspondence and other appropriate means. The staff, in cooperation with teacher-training institutions, prepares instructional materials and curriculum guides for vocational agriculture teachers, conducts research, and assists in planning and conducting in-service and teacher-training programs.

During the year, the staff continued to revise the agricultural education curriculum to meet demands of the present-day concept of the total industry of agriculture. Service personnel were organized to develop and refine curriculum guides for a two-year basic course and for six options open to third and fourth year students. The optional courses include production agriculture, agricultural machinery service, agricultural supplies, agricultural processing, conservation and forestry, and ornamental horticulture. Twenty developmental programs, emphasizing one of the options other than production agriculture, were conducted. Further emphasis was given to the placement of students for supervised occupational experience in agriculture.

In 1966-67 the staff provided professional services to 210 high schools in 87 counties and five cities in which programs of agricultural education were offered.

In these schools a total of 13,618 high school students were enrolled in regular vocational agriculture classes and 3,841 in general mechanics classes; 2,246 out-of-school young farmers were enrolled in 142 young farmer classes. In addition, 5,217 farm men and women were enrolled in 220 evening classes devoted to the discussion of production, conservation, marketing of farm products, and farm-management problems. In adult agricultural mechanics classes, 5,747 persons received instruction in selection operation, preventive maintenance, repair, and construction of farm equipment. During 1966-67, 19,792 persons participated in 68 school community cannery programs devoted to the production and conservation of foods for family consumption. This is a joint activity of the Home Economics and Agricultural Education Services.

During the year the staff, in cooperation with division superintendents, high school principals, and teachers, made many improvements in facilities, equipment, and curriculum materials for vocational agriculture. The results of pilot programs and studies which were conducted last year continued to provide important guidelines for the staff, local school officials, and teachers. The programs aided re-direction and re-orientation of agricultural education to meet the needs of today's rural youth who are preparing for employment in the agriculture industry and in other areas.

In-School Students. High school students who were enrolled in agricultural education carried out 28,586 supervised practice enterprises and 32,905 supplementary jobs. The 44,828 acres of crops, 28,849 head of livestock and 602,234 fowls carried as enterprises by students yielded a total productive income of \$5,060,100. In addition, 1,633 boys were placed on farms and in jobs for occupational experience in agriculture.

Future Farmers of America. The staff provided guidance for the Future Farmers of America, a national organization of students studying agricultural education in the high schools. During the year membership in 207 FFA chapters totaled 12,924. Over 1,000 members attended the FFA Convention at Virginia Polytechnic Institute in June.

The staff, in cooperation with that of the Home Economics Education, provided guidance and leadership in conducting the FFA-FHA Camp at Morgart's Beach and the J. R. Thomas Camp, near Petersburg. During the summer of 1966, a total of 1,085 boys and girls attended these camps, which provided leadership training and recreation.

Young Farmer Classes. Young farmers who were enrolled in 142 organized classes farmed 465,404 acres. Of the 2,246 individuals enrolled, 1,132 were land-owners. Class members purchased 8,299 acres of land during the year and 241 persons improved their farming status. The staff provided guidance for the Statewide Young Farmer Convention held in Virginia Beach in February. At this convention, held jointly with that of the Young Homemakers of Virginia, about 450 young farmers and their wives discussed common problems and made plans for expanding and improving the Young Farmer and Young Homemaker training programs. Instruction in all phases of farm management and agricultural mechanics was emphasized during the year.

Farm Families. The average number of hours of evening class instruction for 5,217 adult farmers was 47.4 and the average number of on-farm instruction

visits was two. Members of agricultural mechanics classes repaired, overhauled, and/or constructed 17,483 items of farm equipment and implements.

Participation in the food production and conservation program was promoted by the cooperative efforts of the staff and teachers of vocational agriculture and home economics. Persons receiving instruction in the preservation of food for family consumption processed in school community canneries the equivalent of 1,780,963 pints of food.

Conferences, Workshops and Other Activities. During the year the Agricultural Education Service conducted a number of State, area, and group conferences to provide in-service training for vocational agriculture teachers.

"Program Direction in Agricultural Education" was the theme of a State-wide conference for vocational agriculture teachers which was held at Virginia Polytechnic Institute in July.

The staff led in planning and conducting 143 State, area, and group conferences for vocational agriculture teachers.

In cooperation with the teacher training staff at VPI and Virginia State College the Agricultural Education Service conducted in-service training programs with emphasis on program planning, agricultural mechanics, farm electrification, soils, animal science, plant science, farm management, and ornamental horticulture. A series of workshops were held in the area of agricultural mechanics, including conferences on metals, electricity, small engines, motor-analyzing equipment, and crops and livestock selection.

Twenty schools conducted developmental programs in optional agriculture courses for third and fourth year students.

Lists of needed curriculum materials and equipment for teaching agricultural education were developed by the staff.

A new brochure, "Agricultural Education in Virginia's Public Schools," was developed and released.

In cooperation with the Film Production Service, eight in a series of 10 film strips on forestry education have been developed and distributed and production was started on two others.

The staff assisted with the implementation of standards and guidelines for young and adult farmer programs.

In cooperation with guidance and other vocational services the staff participated in a Vocational Guidance Institute for high school counselors.

BUSINESS EDUCATION

The Business Education Service is concerned with developing (1) the vocational knowledge, skills, and attitudes needed by youth and adults for employment and advancement in business careers; and (2) the knowledge, understanding and non-vocational skills needed by all persons in everyday contacts with business and economic issues. The major function of the service is to improve instruction in business education at the high school, adult and teacher-education levels.

Instructional activities are being revised to more effectively help students understand automation processes and to perform effectively in businesses using data processing procedures. A few large urban high schools offered introductory

NOTE: Five cities and 87 counties were served by the State program of agricultural education.

courses in the operation of unit record equipment and nine high schools offered a data processing curriculum.

Reimbursements from State funds on a matching basis with local funds were used to purchase instructional equipment for vocational business education. One hundred fifty-six high schools in 70 school divisions participated in these funds, as did one post-high school and eight teacher-education institutions.

Twenty office training programs under the provisions of the Manpower Development and Training Act were offered to 451 unemployed adults.

Business Education Service personnel promote and work actively with the following phases of the school program.

Secondary School Program. During 1966-67, business education subjects were taught in 385 schools by 1,223 teachers to 120,924 students. Of the 385 schools, 32 were junior high schools and two were schools for the deaf and blind. Each of the school divisions had one or more business departments and 299 high schools had reimbursable programs.

Post High School Programs. The Woodrow Wilson Rehabilitation Center at Fishersville offered vocational office training to 126 students and employed five teachers. Triplett Business and Technical Institute employed two teachers and had an attendance of 28 individual students with an enrollment of 140.

Adult Program. To prepare beginning office workers and upgrade and retrain employed workers. Evening classes for adults were offered on a reimbursed basis in 45 schools in 23 school divisions and at one college. Adult enrollment in such subjects as automated data processing, typewriting, shorthand, accounting, secretarial procedures, technical report writing, office machines, and office supervision totaled 6,404 (an increase of 59 percent over 1965-66). Many other schools offered adult programs in business subjects on a non-reimbursed basis. The Center for Adult Business Education, a cooperative venture with Richmond Professional Institute, continues to expand to meet the in-service education needs of many businesses within a 50-mile radius of Richmond.

Vocational Office Training. Vocational Office Training is a cooperative part-time work-training program in business education. During the senior year, students enrolled in this program are in regular school classes for a half day and are employed in community business offices for part of the day. The qualified business teacher-coordinator is responsible for correlating the learning activities in school and on the job. During the 1966-67 school session, this program was offered in 88 high schools and two colleges.

The Vocational Office Training program enrolled 1,612 students, whose annual earnings amounted to \$1,509,958, an average of \$936 per student.

Conferences, Workshops, and Services. In cooperation with the State colleges, seven regional seminars on changing curriculum patterns in business education were held; two three-week workshops were conducted to study data processing; the annual conference on teacher-education met in Richmond in November; monthly meetings and the annual week-long conference for VOT Coordinators and a one-week workshop for new Office Practice teachers were held; a Data Processing Workshop to update State Department personnel and teacher-education personnel was held; and a Leadership Training Summer Conference for FBLA sponsors and officers, one FBLA Convention, and five regional meetings were conducted.

An additional assistant supervisor was added to the staff during this year, bringing the total staff to three. Textbook evaluations were continued during the year.

A double-period pilot study in office procedures was begun in six high schools—Susie Gibson, Staunton River, and Liberty (Bedford County), Valley Vocational School (Augusta County), Midlothian (Chesterfield County), and Dublin (Pulaski County).

A follow-up study of the 1966 June graduates in business education was completed. The table below shows the results of this follow-up:

DISTRIBUTIVE EDUCATION

The staff of the Distributive Education Service assists local school administrators, teachers, and college personnel in the development of the distributive education program to meet the following goals:

- (1) To prepare high school youth for successful employment and careers in the field of distribution.
- (2) To provide middle-management training programs at the junior college level to meet the need for junior executives and specialty salesmen in retail, wholesale, and service fields.
- (3) To provide a community adult training program for persons preparing to enter or already engaged in a distributive occupation.
- (4) To provide the undergraduate and graduate education needed to prepare teachers, supervisors, and other professional workers for a rapidly expanding program.

The State staff provided professional services to 166 high schools and five colleges in 51 counties and 30 cities where the distributive education program was in operation. These services included conferring with school administrators, visiting individual teachers, attending cluster meetings of teachers, in-service workshops and conferences, and participating in local pre-school conferences.

In all local contacts, major emphasis was placed on the improvement of program standards in the following areas: pupil-teacher ratio, techniques for effective supervision and coordination of on-the-job training for high school and post high school enrollees, effective guidance techniques for the new preparatory phase of the high school program, expansion of preparatory training for out-of-school youth and adults, and classroom facilities and equipment.

Progress and growth which took place in each type of distributive education program is indicated below together with additional services offered by members of the Distributive Education Service.

High School Program. Due to a continued emphasis on the development of the three-year sequence in distributive education, a new tenth-grade preparatory phase has been incorporated into 133 of the 166 high school programs. Enrollment in this preparatory phase reached 3,130 students, representing approximately a third of the total distributive education enrollment. The remainder, 6,024 students, were enrolled in the cooperative program which combines on-the-job training with classroom instruction. The addition of 14 new high school programs and expansion in existing programs required the services of 219 local DE teacher-coordinators and supervisors.

With the large increase in high school enrollment, considerable study was made to develop pupil-teacher ratio standards for distributive education which would assure a vocational approach in teaching the DE preparatory course and which would provide the DE coordinator with adequate time for planning and supervision of participation activities and on-the-job experiences of both preparatory and cooperative students. An initial set of standards was developed for use on a trial basis to specify the number of classes per day, enrollment per class, and overall pupil-teacher ratio which distributive education coordinators could realistically assume.

Five rural high schools initiated DE programs by offering the preparatory phase. These programs proved highly successful in establishing a pattern of operation for other rural high schools.

To serve youth with special needs a course in distributive education for employment was continued for ninth-graders in two metropolitan school divisions. The course again proved successful in holding potential dropouts in school and preparing them for employment or for returning to the regular school program. In cooperation with local offices of the Virginia Employment Commission, distributive education coordinators in five metropolitan centers offered 15 pre-employment classes to train 128 unemployed school dropouts for distributive jobs. Two counties holding pre-employment training for the National Youth Corps enrolled 331 persons. Through regular DE classes coordinators in 23 high schools served 57 ninth-grade students who were considered potential dropouts.

Post Secondary Program. A total enrollment figure of 198 represents nearly a 50 per cent increase in three programs which prepare persons for junior executive and middle-management careers in distribution. Evening school offerings which are available in two of the programs, reached high school dropouts and others who are now employed in distribution. In another program, the block plan was continued to allow students to attend school full time in the summer and to work full time during the fall semester.

A significant development was the study and research leading to the pattern for establishing a post secondary DE program at Northern Virginia Community College in the fall of 1967. This will be the first DE pilot program to operate in one of the community colleges.

Old Dominion College developed the curriculum and pattern of operation for a two-year hotel and motel management option to begin in the fall of 1967.

Adult Program. Enrollment in the distributive education adult program increased for the fifth consecutive year with 23,250 owners, managers, supervisors, and employees of distributive businesses participating in 824 different classes which were organized and/or taught by 153 DE coordinators and 243 business specialists.

The adult program expanded considerably through pre-employment training for persons planning to enter distributive occupations either on a full-time or part-time basis. A total of 251 pre-employment classes were offered with an enrollment of 7,878 out-of-school youth and adults.

In cooperation with the Virginia Real Estate Association, a Statewide training program was initiated for the real estate field. The Distributive Education Service was requested to serve as the official agency to offer training which is required by law to become a licensed realtor. Other areas where significant enrollments in adult classes occurred include management courses, supervisory development programs, and basic classes in food distribution and department store, restaurant, variety store, and hotel-motel operations.

Teacher Education. Forty-two seniors at Richmond Polytechnic Institute and Virginia Polytechnic Institute completed requirements for the bachelor's degree in distributive education. Of this number, 16 graduates accepted DE teaching positions in Virginia.

At RPI, approximately 80 students were enrolled in the graduate program leading to the master's degree in distributive education. Seven of that number

received their masters' degrees this year. The majority of the enrollees were full-time DE coordinators doing graduate study on a part-time basis.

Fourteen professional and technical courses were offered in summer school at RPI and VPI to assist DE coordinators in advancing professionally or meeting certification requirements.

Conferences, Workshops and Services. Staff members conducted more than 100 State, area, and group conferences for distributive education teachers.

In cooperation with VPI, a series of six instructional methods workshops were held throughout the State with approximately 150 DE teacher-coordinators participating.

Local supervisors attended a two-day conference in February to refine techniques and procedures for supervisory and administrative responsibilities and for local in-service training of DE teachers.

A two-day workshop on methods of teaching was conducted in April for 44 real estate executives to train them for teaching local adult classes in the real estate field.

Two staff members attended the National Clinic on Distributive Education held in Chicago in January.

The teacher-educators at RPI and VPI attended national workshops on the project method of instruction in distributive education. Their findings will be used to implement and refine the project method in the new DE I preparatory course.

A travel industry training film entitled "The Magic of Virginia" was developed in cooperation with the Film Production Service of the Department of Education. In cooperation with the Travel Development Committee of the Virginia Chamber of Commerce, the film premiere was held in December with more than 60 of the State's travel industry leaders on hand to review the film and suggest effective ways to use it to promote training in the travel industry.

Forty-one school divisions received State and federal funds on a matching basis to purchase basic classroom equipment for distributive education programs.

Through special arrangements with RPI and Old Dominion College, the services of three part-time research specialists were engaged to develop the following instructional materials for the high school DE program: trends in distribution, consumer finance, the role of credit in selling, credit principles and practices for sales personnel, and advertising layout and copywriting. In addition, a guide for preparing teaching plans, "Part II Teaching Plan Pattern and Procedures," was developed to give teacher-coordinators opportunity to develop lesson plans from topical outlines.

A manual entitled "Distributive Education Supervisor's Handbook," developed by 14 local DE supervisors over a period of two years, was edited and published for distribution.

In 10 counties where no distributive education program is offered the State staff established contacts with school administrators to plan community surveys and conduct adult management classes in preparation for establishing a regular full-time DE program.

TABLE 25—SUMMARY OF WORK IN DISTRIBUTIVE EDUCATION

SESSION	IN-SCHOOL				OUT-OF-SCHOOL			Total Enrollment

HOME ECONOMICS

The staff of the Home Economics Education Service assists secondary school administrators and home economics teachers in the development of a program which has these goals: preparation for the vocation of homemaking; preparation for gainful occupations using home economics knowledge and skills; and motivation of students with scholastic and leadership abilities to pursue college education in preparation for professional careers in home economics.

The staff works cooperatively with Virginia colleges in the pre-service education of students who are preparing to teach home economics.

Scope of Program. In 1966-67, home economics education programs operated in each of the State's 121 school divisions, which include 96 counties and 35 cities. In these divisions 479 high schools offered home economics programs under the direction of 798 teachers. Enrollment in home economics classes in grades 8-12 totaled 62,384. Of this number, 843 were enrolled in home economics-related wage-earning courses and 1,249 were enrolled in courses for students with special needs. The remaining 60,292 were enrolled in homemaking courses. In addition, 1,799 seventh-grade students were enrolled in homemaking classes for a full year and 20,664 seventh- and eighth-graders received homemaking instruction for less than a full year.

The Home Economics Service reached 6,846 out-of-school youth and adults in various programs: 5,167 were enrolled in organized homemaking classes for adults; 758 received instruction in home economics through Young Homemakers of Virginia; 85 adults were enrolled in home economics-related gainful occupation courses; and 836 adults received instruction in other home economics classes which are preparatory for gainful occupation courses.

Improvement of Instruction. Supervisory personnel visited 296 schools and worked with 500 teachers to review teachers' work plans for the year, to observe units of instruction being taught, to determine strengths and weaknesses in the program, and to make suggestions and recommendations for improvement of local programs.

Staff members participated with local administrators and teachers in 254 group meetings to discuss program offerings and the scheduling of courses in homemaking (useful occupation) and in gainful occupations using home economics knowledge and skills.

In cooperation with local school administrators, the State staff served on evaluation committees which studied 26 secondary school home economics programs.

Two workshops were conducted to aid 33 teachers who were developing gainful courses as a part of the local home economics program for the first time.

One annual conference was held which gave home economics teachers an opportunity to plan programs for the year ahead and to explore ways of improving instruction. The conference stressed promoting and developing the gainful occupation phase of the program; working with persons with special needs; working with other groups in the school and community; and improving instruction in homemaking for youth and adults.

Development of Curriculum Materials. The supervisory staff and teachers took the first steps toward a major revision of the curriculum guide for the homemaking phase of the home economics program.

To aid in the development of the gainful occupation phase of the program, curriculum materials in food, clothing, and homemaker's assistant services have been prepared and made available to teachers in schools offering these courses. Materials have been used and revised as needed.

Improvement of Space and Facilities. Assistance was given to school divisions in planning 19 new and remodeled departments and in setting standards for purchasing equipment.

Staff members helped 56 schools prepare budgets and select equipment. Instructional equipment was placed in 41 of these schools and facilities for instruction in home economics-related gainful occupation courses were improved in 15 schools.

Strengthening the Youth Organization, Future Homemakers of America. Staff members planned and directed a Statewide leadership training meeting which was attended by 550 representatives and advisers of the youth organization, Virginia Association, Future Homemakers of America. This organization, with a membership of 18,715 persons in 362 chapters, is designed to enrich and supplement classroom instruction. Its membership comprises students who are enrolled, or have been enrolled, in the home economics program.

Strengthening Instruction for Adults. The staff worked with local school administrators and teachers to develop instructional programs in homemaking for adults and members of Young Homemakers of Virginia.

These courses included instruction in clothing selection and construction, meal planning and preparation, child development, and home management. Primarily, they were taught by a regular home economics teacher as a part of the total program; however, in situations where the in-school enrollment was too heavy to allow this, part-time teachers were employed.

Gainful occupation courses which prepare adults for work as homemaker's assistant were taught in Norfolk and Roanoke. Other classes prepared adults for entering and advancing in clothing service and food service occupations.

Instruction for Students with Special Needs. Courses in home economics were provided for 1,249 students with special needs who were not functioning effectively in the regular school program. These courses contributed to holding potential dropouts in school and to making them better homemakers and wage-earners.

Cooperative Work with Other Services and Divisions. Staff members participated in the vocational guidance summer institute which was held to acquaint high school guidance counselors with opportunities and offerings in all fields of vocational education. A revised statement of standards, entitled "Organization of the Home Economics Education Program in Secondary Schools," was distributed to 162 guidance counselors who attended the institute.

In cooperation with the Bureau of Teaching Materials, new home economics reference books were reviewed and evaluated and lists of recommended books were given to local school administrators and teachers.

Plans for new home economics departments were reviewed in cooperation with the School Buildings Service and recommendations for revisions were made to provide optimum facilities for instruction.

Cooperative Work with Colleges on Preparation of Home Economics Teachers. Heads of Home Economics Departments and teacher educators from the nine

Virginia colleges approved for the preparation of home economics teachers met twice during the year with members of the State staff to discuss trends and new developments in the home economics program. Special emphasis was placed on the preparation of teachers to instruct courses in gainful occupations as well as regular homemaking courses.

As a result of these meetings each college agreed to analyze its teacher-training program and to find ways of incorporating experiences to aid pre-service teachers in preparing to teach gainful occupation courses. Also a committee was appointed to receive and compile procedures to be used by each college. The procedures include the following:

1. Discuss the purposes of gainful occupation programs and curriculum materials in home economics education courses.
2. Wherever possible, place student teachers in schools where the home economics program includes gainful occupation courses as well as courses in preparation for the vocation of homemaking.
3. Assist home economics education majors in their junior year to plan individual summer work experience programs in occupations using home economics knowledge and skills.
4. Guide home economics education majors to use their electives to gain depth in home economics subject areas in which they are especially interested and in which there are employment opportunities.

The area supervisors of Home Economics Education visited colleges in their respective areas and met with home economics education majors to discuss the program being developed in secondary schools.

INDUSTRIAL EDUCATION

Industrial Education Service provides leadership for improvement of vocational-industrial and general education instruction.

Industrial education includes instruction for industrial arts, trade and in-industrial, for health, occupations, and technical occupations. It provides occupational training of a preparatory and supplementary nature, as well as general education through industrial arts. Preparatory programs also are provided for youth with special social, economic, or academic needs.

Preparatory Programs

Trade and Industrial (T and I) Occupations

Preparatory programs were provided for students in grades nine through 12 who had made an occupational choice and were pursuing comprehensive high school training leading to entrance level employment. These programs provided foundations for the skilled crafts and service trades such as carpentry, auto mechanics, drafting, electrical trades, and cosmetology. Trade classes were taught by 106 teachers in 86 secondary schools.

Part-time Cooperative (Industrial Cooperative Training) programs were conducted for high school juniors and seniors who were 16 years of age or older. These students attended school half of each school day and received work experience on the job the other half of the day. Systematic training was given on the job and supplementary instruction which related to the training was given in the high school. Part-time Cooperative classes were taught by 86 teachers in 86 schools.

Post-secondary preparatory programs were provided for persons who had graduated from, or had otherwise left, high school and were pursuing training on a full-time basis. The scope and content of these programs were the same as for secondary programs, but were in greater depth due to the additional hours provided by full-time study. Post-secondary T and I preparatory classes were taught by 51 teachers in five schools.

Adult preparatory classes were provided on a part-time basis, usually during evening hours, for persons preparing to enter an occupation. Short-term, full-time classes were conducted in certain localities to provide skills useful in local industries. Adult T and I preparatory classes were taught by 36 teachers in 15 schools.

Health Occupations

Secondary preparatory programs in health occupations were conducted in grades 11 and 12 and consisted primarily of Pre-Clinical Licensed Practical Nursing classes for seniors and Medical Assistant's classes for juniors and seniors. Secondary health classes were taught by 18 teachers in 16 schools.

Post-secondary preparatory programs were provided in the clinical phase of Licensed Practical Nursing (LPN)—for completion of the LPN program by students who began their training in high school. Also, complete LPN programs and programs for Certified Laboratory Assistants, Dental Technicians and Medical Aids were conducted. All classes were on a full-time basis. Post-secondary health preparatory classes were taught by 71 teachers in 33 schools.

Adult preparatory programs for nursing aids and orderlies were conducted on a part-time basis by four teachers in three schools.

Technical Occupations

Secondary preparatory programs were conducted in the high school for students in the eleventh and twelfth grades who desire employment as highly skilled technicians. Secondary technical programs required a year of post-graduate work. The curricula were designed with emphasis on the application of mathematics and science in technical problem solving. The technology of electronics was taught by five teachers in four schools.

Post-secondary preparatory programs were conducted for persons who had completed high school and were in full-time attendance at a post-secondary institution. The curricula and purpose of these classes were the same as those for secondary programs, but included the technologies of drafting and design, air conditioning and refrigeration, civil and highway design and construction, and electronics. Post-secondary technical classes were conducted by 34 teachers in two schools.

Adult preparatory technical classes were conducted on a part-time basis, during evening hours, for persons preparing to enter some phase of technical work. Three teachers at one school conducted classes in the technologies of civil and highway, drafting and design, and electronics.

Youth with Special Needs

These programs were conducted in the intermediate and secondary schools for youth who, due to social, economic, or academic handicaps, had made poor adjustments while in school. The purpose of these programs is to provide a means whereby a student with special needs may learn a degree of occupational skill in accordance with his capabilities and become employable upon leaving school. Special needs programs were conducted by 40 teachers in 32 schools.

Supplementary Programs

Supplementary programs are designed for employed adults who wish to supplement or upgrade their skills and knowledge in the trade, technical, industrial, or service occupation in which they are presently, or have been, engaged. The following types of supplementary classes were conducted on a part-time basis by 1,252 instructors in 349 schools.

Supervisory Personnel Development—to upgrade foremen, supervisors, and other minor executives by increasing their supervisory, teaching, and managerial abilities.

Safety Training for Employees of Electric Cooperatives—to offer on-the-job safety instruction throughout the year.

Apprentice Training—to provide related instruction either in regular evening classes or via a group study plan.

Practical Coal Mining—to reduce lost-time accidents through job-safety instruction.

Public Service—to improve technical skills of public service employees including firemen, policemen, and surveyors.

Industrial Arts

Industrial arts classes were conducted as general education to provide opportunities for students to study about and have practical experiences with tools, machinery, and experimental equipment, with emphasis placed on their application to materials, processes, products, and problems of American industry and technology.

Industrial Arts was taught by 694 teachers and was offered in 346 secondary schools in grades seven through 12. In addition, industrial arts was offered in many school divisions to post high school youths and adults on an avocational basis. Activities included cabinetmaking, furniture repair and refinishing, upholstery, ceramics, jewelry work, leathercraft, and drawing.

The following bulletins, brochures, and guides were developed or revised by the Industrial Education Service: TIES (four issues); Follow-Up Report of ICT, Trade, and Technical Graduates; Annual Statistical Report for Industrial Education; Industrial Education Directory; Course Outline for ICT; Listing of ICT Resource Material (general related); Guide for ICT Coordinator's Responsibilities; Curriculum Guide for Industrial Arts and Vocational Electronics—Electricity; A Manual for the Administration and Organization of Industrial Arts; Curriculum Guides for Industrial Arts, Mechanical Drawing, and Woodworking; and Listing of Industrial Education Library Materials.

Fifty-seven industrial arts teachers were added to the total program of industrial education; eight new programs for "Youth with Special Needs" were established; and several local advisory committees were organized during the year.

The Service trained several teams to conduct community surveys to determine the need for industrial education, and the staff cooperated with the Division of Industrial Development and Planning in organizing training programs for new industries in Virginia.

Statewide conferences were conducted for industrial education personnel, industrial arts teachers and supervisors, guidance counselors, and State supervisory personnel and teacher educators. One Statewide student conference was held for the Virginia State Association of the national youth organization, Vocational Industrial Clubs of America.

Additional meetings included two conferences for local supervisors of industrial education and principals of area vocational-technical schools, several area workshops for ICT and apprentice coordinators, and several pre-school workshops for industrial education teachers. The Service also was represented at a number of regional and national conferences devoted to various phases of industrial education.

One member of the staff served on the Governor's Commission for the Aged.

TABLE 27—ENROLLMENTS IN INDUSTRIAL EDUCATION—1965-1967

SESSION	INDUSTRIAL-VOCATIONAL					Industrial Arts
	PREPARATORY				SUPPLEMENTARY	
	Secondary	Post Secondary	Adult	Special Needs	Adult	
1964-65.....	7,429	3,366	2,375	52	15,569	54,794

1966-67.....	8,663	2,982	1,028	962	21,800	57,050

MANPOWER TRAINING SERVICE

In accordance with the policies of the State Board of Education, and in cooperation with the Virginia Employment Commission, the Manpower Training Service is responsible for providing training in occupational categories for unemployed and underemployed persons within the State who qualify under the provisions of the Manpower Development and Training Act of 1962, including the Amendments to the Act in 1963 and 1965. These amendments provide for basic educational training for individuals who are excluded from occupational training because of an inadequate educational achievement level and provides for refresher courses or other training for individuals who have become unemployed because of the specialized nature of their previous employment.

Basically, the purpose of the Manpower Development and Training program is to relieve unemployment caused by automation, shifts in market demands, employment trends, and other economic changes. The program does not replace the need for existing vocational training, but expands and broadens the training programs available for workers in all occupations.

State staff members work with school divisions to achieve a number of objectives. They include providing assistance in organizing curriculum guides and course outlines and developing standards of occupational competency; preparing budgets for each proposed training program and reviewing completed programs; providing courses in instruction based on the recognized needs of individuals who are to receive training; periodically reviewing and evaluating training programs, including recommendations for improvement and the need for continuing the training; and initiating steps to assure that training projects are formulated without delay and that the quality and adequacy of the training provided is consistently maintained.

During the school year 1966-1967, 52 Manpower Training programs were planned, budgeted, and approved for training 1,852 individuals in Virginia. Training was provided in 25 occupational areas and programs were operated in 22 school divisions. The length of the programs varied from four to 104 weeks, depending upon the occupational area.

Programs starting during the 1966-1967 school year and those continuing from the 1965-1966 school year total 111 with an enrollment of 2,866.

Trainee graduates of Manpower Development and Training Programs numbered 1,359 during the school year 1966-1967.

Five centers for school dropouts were in operation, providing both job-oriented basic education and occupational training. The basic education courses were provided for persons who had not completed the sixth grade. Guidance, counseling, and testing services were provided as an integral part of each center.

A pilot program with national implications was developed cooperatively with the Federal Bureau of Apprenticeship and Training, The Virginia Employment Commission, and the Virginia Office of Economic Opportunity. This program provides basic education to on-the-job trainees selected by the Virginia Office of Economic Opportunity through an agreement with local Community Action Committees.

A maximum of 12 weeks of basic education will be available for on-the-job trainees who need special help in getting a job and functioning satisfactorily after employment. Curriculum is based on individual needs for basic education, orientation to the world of work, and citizenship.

Eleven project review and approval sessions were held in cooperation with representatives of the Virginia Employment Commission; the Bureau of Employment Security, U. S. Department of Labor; and the U. S. Office of Education, Department of Health, Education and Welfare.

The Service, which held 61 planning conferences with representatives of local school boards and local employment office managers, cooperated with business and industry in planning training commensurate with their needs and the needs of available trainees.

Manpower Training personnel attended two regional conferences, and two meetings of the Southeastern Regional Manpower Development and Training Act Advisory Committee; presented the Manpower Training program at one vocational guidance institute; and conducted two conferences and workshops for local Manpower Training supervisors and four in-service teacher training workshops.

The Service was represented at the first National TELCOM conference on manpower training policies, procedures, and problems, and served on the Virginia Manpower Coordinating committee, which works to coordinate manpower services available through the various governmental agencies as established by the Cooperative Area Manpower Planning System (CAMPS).

SCHOOL LUNCH

Modern educators consider the lunch program an extension of the educational curriculum. The schools' acceptance of responsibility for the environment and activities of students for the entire school day has emphasized the importance of the school lunchroom. New teaching methods and centering learning in life experiences have focused the attention of alert educators upon the school lunch. Understanding its educational value has led to correlation of the school lunch program with the total school curriculum.

Staff members who are responsible for leading and assisting school divisions in the development of the school lunch program, work as follows: (a) to assist in planning and developing school lunch operations; (b) to aid in administering and evaluating programs; (c) to conduct workshops and conferences for the professional improvement of school lunch personnel; (d) to initiate study groups for work on improving standards of operation; (e) to review school building plans to help determine adequacy of lunch room facilities; (f) to prepare, review, and distribute new materials and to interpret materials previously distributed to school lunch personnel; and (g) to encourage the development of the educational aspects of the program.

During the 1966-67 school session 1,763 schools served lunches to an average of 502,443 pupils daily and milk to many more pupils. All except two of these schools participated in the national school and/or special milk programs. The total expenditure for operational cost for the school lunch and special milk programs in Virginia public schools for the 1966-67 session was \$36,219,667.

National School Lunch Program. A total of 1,753 schools were approved for participation in the national school lunch program and received a food reimbursement of \$4,182,290 for 89,380,926 lunches. These funds were used to serve lunches to a daily average of 495,405 pupils for an average of 178 school days. The highest average daily participation (512,197) was in December 1966; the lowest average participation (484,033) was in February 1967.

Commodity Distribution Program. Through the State Department of Agriculture's Division of Markets, the U. S. Department of Agriculture distributed commodities valued at \$5,722,959 to 1,763 schools.

Special Milk Program. A total of 1,753 schools participated in the special milk program. Of this number 1,705 served lunches and also provided additional milk on which reimbursement was paid, while 48 schools only offered milk due to lack of serving facilities or non-participation in the national school lunch program. Under the special milk program, 47,081,613 half pints of milk were served over and above those served with complete lunches. The schools were reimbursed \$1,557,853 on the purchase price of the milk, thus reducing the price of the milk to the pupil.

Breakfast Programs. Seventy schools participated in a breakfast program. Of that number 29 schools served breakfast under the Child Nutrition Act of 1966. A total of 175,478 breakfasts were served to an average of 2,325 pupils daily and \$24,720 was received by these schools from federal funds.

Nonfood Assistance. The Child Nutrition Act of 1966 provided funds for obtaining school food service equipment in schools that draw attendance from areas in which poor economic conditions exist. Approximately \$12,000 was allocated for 17 schools in the 12 Virginia School Divisions which participated in the program. The localities paid 25 percent of the total cost.

The supervisory staff visited 931 schools in the State and worked with school administrators, teachers, and school lunch personnel. In addition, 311 conferences were held with superintendents to evaluate and plan progressive steps in program operation. Evidences of the development of the school lunch program are:

Growth of Program. Lunches were served in 1,763 schools, an increase of 19, or 1.1 percent over the previous year. The average number of pupils eating lunch daily increased by 8,039, or 1.7 percent, over 1965-66 in schools using funds provided by the national school lunch program. Total half pints of milk served with the lunches and sold extra increased by 1,340,889 or one percent.

The average number of pupils served complete lunches daily represented 54.8 percent of the enrollment of the State.

Evaluation of Program. Evaluations in 580 schools revealed the strengths and weaknesses of the programs. The evaluations included a study of meal adequacy, sanitation, participation, records, and other phases of operation. A study of these evaluations revealed evidences of improved quality and quantity of the lunches served. Follow-up studies were made to note improvement in the various phases of operation.

Training Program for Personnel. College credit courses are offered in four State institutions to provide training in nutrition, food preparation, and management. Seven area conferences were held with 645 enrolled. The local and State staffs conducted 68 training meetings with 1,638 persons attending. Twenty-eight meetings were held, in which 539 parents, teachers, administrators, and school lunch personnel participated. The 30 school divisions (14 counties and 16 cities) having local supervisors gave increased emphasis to personnel training, which resulted in better trained personnel for new positions and better operating procedures.

A three-day conference was jointly planned and conducted by local and State school lunch supervisors.

Educational Experiences. Evidence that the school lunch program has contributed to the educational experiences of pupils has been reported by principals and teachers. These experiences have been provided through activities in health education, mathematics, science, and social studies. More and more the lunchroom is recognized by administrators and teachers as an educational laboratory to be used in correlating the teaching of food habits, citizenship, and other factors which are daily experiences of the pupil.

Improved Facilities. The necessity for providing adequate facilities for serving lunches is receiving increased attention in building plans for new or remodeled

schools. Long-range plans for the purchase of new equipment indicate that the lunch program is meeting a need in the schools. Continued improvement in the quality and quantity of large equipment has been noted.

TABLE 29—SUMMARY OF SCHOOL LUNCH PROGRAM—1965-1967

SESSION	SCHOOLS HAVING LUNCH PROGRAMS	SCHOOLS USING FEDERAL AID		AVERAGE NUMBER PUPILS SERVED DAILY		
		National School Lunch	Special Milk Only	Free or Partially Paid	Paid	Total
1964-65.....	1,688	1,675	118	26,023	429,889	455,912
1965-66.....	1,744	1,738	75	33,573	453,793	487,366
1966-67.....	1,763	1,753	48	44,690	450,715	495,405

VETERANS EDUCATION

The State Department of Education is the approving agency for institutions desiring to provide education and training for eligible persons under the provisions of Title 38, United States Code. The eligible persons are veterans who may receive financial assistance under the provisions of the Veterans Readjustment Benefits Act of 1966, war orphans, and dependents of seriously handicapped veterans.

The Committee on Veterans Education has established policies to be followed by the Executive Officer of the Committee in carrying out the provisions of the law in accordance with fundamental principles of education. The agency approves only such institutions and courses which will offer a sound program of education and training.

The following types of institutions are approved: Virginia institutions of higher education accredited by the State Board of Education; secondary schools accredited by the State Board of Education; public and private vocational schools; hospitals approved by the Council of Medical Education; and hospitals of The American Medical Association.

Private vocational schools must meet approval requirements established by the Division of Vocational Education of the Department and must have had at least two years' successful operation as a school within the State before approval can be given for veterans training.

During the year the Committee received 210 applications for the approval for courses from institutions in the State which were processed as follows: 189 approvals, 16 disapprovals, and five not processed by July 1, 1967.

The following changes were made during the year in the number of approved institutions: 81 institutions approved as of July 1, 1966; 62 institutions approved during the year; and 141 institutions approved as of June 30, 1967. The approvals for two institutions were withdrawn during the year.

There were 200 visits made to public, non-profit, and proprietary institutions in the State. These visits were made to ensure that the requirements of the Law were being met and to inspect for approval, and upon the request of the Veterans Administration.

The Veterans Readjustment Benefits Act of 1966 has been in effect for only

seven months and the number of approved institutions with eligible persons enrolled is expected to increase in the future.

CONSTRUCTION OF VOCATIONAL FACILITIES

Construction of vocational education facilities in four school divisions was started during the 1964-65 school year with funds available under the Vocational Education Act of 1963.

The Act describes an area vocational school as one which offers five or more occupational programs for full-time students. To be eligible for aid, a construction project must provide facilities for five or more occupational offerings which will be housed in one school. Such a facility can be the vocational department of a comprehensive high school, a separate vocational education center serving the students from one or more high schools, or a school offering post-secondary vocational and technical training.

These vocational facilities should be available after school hours for classes for persons who have already entered the labor market and who need training or retraining to achieve stability or advancement in employment.

Also, these construction projects may include vocational facilities for youth who are potential dropouts and who are not able to compete in regular vocational programs on the junior and senior year levels.

National and local studies show that the majority of high school students enter the labor market when they leave high school as a dropout or as a graduate. To be prepared to compete for available jobs, it is important that these young people have the opportunity to secure vocational training in high school.

The vocational staff assists local school administrators in planning job opportunity and student interest surveys to secure information used to select the occupational training programs to be housed in a proposed building, assists in determining the space requirements for each training program, reviews the equipment arrangements that are developed by the architect, and works cooperatively with the School Buildings Service in evaluating the functional aspects of building plans and specifications.

During the 1966-67 school year the vocational staff assisted seven counties in the Appalachian area in the planning of vocational buildings which were approved and funded under the Appalachian Act. Construction was started on two of these projects.

TABLE 30—VOCATIONAL EDUCATION CONSTRUCTION PROJECTS

NUMBER PROJECTS STARTED IN SCHOOL YEAR	Student Enrollment Capacity	No. Square Feet in Project	Cost of Construc- tion
1964-65 4	1,086	80,250	\$ 975,227
1965-66 10	3,188	257,829	3,039,608
1966-67 10	4,454	511,224	9,061,998
Totals—24	8,728	849,303	13,076,833

DIVISION OF EDUCATIONAL RESEARCH AND STATISTICS

The activities of the Division of Educational Research and Statistics during 1966-67 are summarized below under the four functions of the Division.

Function 1: To conduct research studies requested by the State Board of Education and the State Superintendent of Public Instruction.

The following studies were completed during the 1966-67 session:

AN ANALYSIS OF THE USE OF TEACHER TIME IN VIRGINIA. This study, which was published in December 1966, includes information about the teacher, his school and teaching assignment, the length of instructional day, out-of-class instructional duties, and clerical duties. Although the amounts of time teachers spent on various tasks covered a considerable range, the data indicate that most public school teachers in Virginia spend nine to 10 hours a day preparing to teach, teaching, evaluating pupils' work, and performing clerical duties. The teacher's day includes approximately seven hours at school plus two to three hours outside the regular school day for personal study, planning for instruction, professional review, evaluation of pupils' work, and clerical duties. Most teachers spend approximately an hour on clerical duties during the regular school day.

AN OVERVIEW AND COMPARISON OF THE STRUCTURE OF PUBLIC EDUCATION IN FLORIDA AND NORTH CAROLINA was completed and presented to the Committee on Raising the Level of Public Education in Virginia. Analysis was made of the public school laws and constitutions of each state. Staff members of the Division of Educational Research and Statistics visited the departments of education in both states and made their final analysis in terms of observed practices as well as printed documents.

A study of the salaries of personnel at comparative levels in colleges and universities, in public schools, and in the State Department of Education was completed and presented to the State Superintendent of Public Instruction in February 1967.

The Division of Educational Research and Statistics published or assisted other divisions of the Department in publishing the following reports:

Young Women in Virginia, A Ten-Year Follow-Up Study of Girls Enrolled in the Tenth Grade in Virginia High Schools, August 1966

A Descriptive Analysis of Selected Factors Related to Educational Operations and Achievement for the State of Virginia, February 1967

Comparison of Contracted Salaries of Public School Personnel, 1965-66 and 1966-67, May 1967

Facing Up . . . Statistical Data on Virginia's Public Schools, January 1967

The staff of the Division of Educational Research and Statistics made several statistical projections, including *Projected Enrollment in Virginia Public Schools, 1966-67 through 1981-82*, which was completed in May 1967.

Function 2: To encourage and assist school divisions in designing and conducting pilot studies.

The 1966 General Assembly appropriated \$75,000 for each year of the 1966-68 biennium to aid localities in these studies. The purpose of supporting pilot studies is to encourage local school divisions to define their educational problems and utilize new methods in solving these problems.

During the 1966-67 school year, 28 pilot studies were conducted in 12 county and eight city school divisions. Seventeen of these studies were begun in the 1966-67 school year, and 13 will be continued through 1967-68. All proposals for pilot studies are reviewed by the research staff of this division and specialists in respective problem areas before receiving final approval. Proposals which are well-formulated and clearly-defined and have potential Statewide value are approved for funding.

As evidenced by the increase in the number of pilot studies each year, many local school divisions are initiating studies to create an awareness within their professional staffs of the need to implement new ideas and techniques in teaching today's youth. The pursuit of better answers to educational problems through experimentation and research in local systems throughout the State will accelerate the rate of improvement in the quality of public education in Virginia.

Pilot Studies in progress during 1966-67 were:

Focus on Social Studies (Albemarle County)

Grouping for Reading Instruction According to Achievement in Eight Skill Areas (Second Year of Study—Albemarle County)

An Investigation of Selected Vision Procedures (Arlington County)

A study of the Kindergarten Program for Comparison of a Program Operating on a Full-Day Basis with the Regular Half-Day Program Now in Existence (Arlington County)

Selected In-Service Experiences for Inexperienced Teachers (Arlington County)

A Comprehensive Follow-Up Study of Reading Achievement at the Third Grade Level and a Continued Study at the First Grade Level (Third Year of Study—Arlington County)

A Study Concerning the Establishment of Classes in Academic Subjects Taught in a Foreign Language and the Effectiveness of Learning in These Classes (Second Year of Study—Arlington County, Alexandria City, Fairfax County, Richmond City)

A Study of the Effectiveness of a Structured and Sequenced Program of Vocabulary Study in Improving Reading, Writing, and Listening Skills of High School English Students (Chesapeake City)

Pre-Algebra Study for Non-Achievers in Mathematics (Second Year of Study—Chesapeake City)

Use of Helping Teachers in Sixth Grade Mathematics Curriculum (Chesapeake City)

- A Study Concerning Slow Learners in English, Grades Eight Through Twelve (Dinwiddie County, Hanover County, Washington County, Fredericksburg City, Roanoke City)
- An Experimental Program to Develop Language Concepts and Composition Skills (Fairfax County)
- A Functional Non-Graded English Program for Pupils with Below Average Achievement (Fairfax County)
- School Within A School Inter-Discipline Program for Under-Achievers (Fairfax County)
- Analysis of BSCS Materials for Slow Learners (Fauquier County, Newport News City)
- A Non-Graded Multi-Grouped English Program for Eleventh and Twelfth Grade Students (Harrisonburg City)
- Team Teaching of Basic Areas of Science in Eighth Grade Using a Lab Approach (Harrisonburg City)
- An Evaluation of the Dual-Progress Classroom Organization and the Self-Contained Classroom Organization in Grades Four Through Seven (King George County)
- The Effectiveness of Specially Selected Materials to Improve Mathematical Achievement of Pupils in Grade Four (Newport News City)
- The Effects of Grouping Disadvantaged Children for Reading Instruction in Grade One (Newport News City)
- The Effectiveness of a Distributive Education Preparatory Course on Student Progress in Distributive Education II (Newport News City)
- A Study to Determine the Relationship Between Mathematical Ability and Mathematical Achievement of Certain Pupils Entering the Eighth Grade (Second Year of Study—Newport News City)
- A Study of the Learning Problems of Pupils Having Below Average Achievement and Exploration of the Values of Using Special Instructional Materials and Procedures with These Pupils (Third Year of Study—Prince William County)
- The Use of School Office Aides in Public Schools (Richmond City)
- A Demonstration Study to Determine the Effects of Increased Emphasis in the Teaching of Reading in Grades Four Through Seven (Third Year of Study—Rockbridge County)
- How Does Perceptual Training in the First Grade Affect the Reading Achievement of the Pupils? (Second Year of Study—Shenandoah County)
- The Audio-Lingual Teaching of English to the Slow Tenth Grade Learner (Second Year of Study—Tazewell County)
- Science Enrichment for the Academically Talented (Second Year of Study—Virginia Beach City)

Function 3: To Coordinate Educational Research in the State.

RESEARCH WORKSHOP. The Division of Educational Research and Statistics sponsored a two-week workshop in June 1967. The workshop involved participants responsible for Title I projects, Title III projects, and Pilot Studies. The staff members of the workshop were from several different colleges and universities and from the State Department of Education.

CRITICAL AREAS OF RESEARCH AS IDENTIFIED BY DIVISION SUPERINTENDENTS. The Division of Educational Research and Statistics invited each division superintendent to submit a list of not more than five critical issues which were believed to require investigation to improve his division. These responses, which have been studied and categorized into specific areas, will be the basis for initiating pilot studies and other research projects.

PILOT STUDIES. An analysis of five of the completed Pilot Studies was published during 1966-67. The titles and respective divisions were:

Providing a Modified School Program for the Potential Dropout, Wythe County Public Schools, November 1966

The Earth Science Curriculum Project for the Ninth Grade, Richmond City Public Schools, November 1966

The Initial Teaching Alphabet for Beginning Readers, Richmond City Public Schools, November 1966

The Experimental Use of Reading Materials Published by the Open Court Publishing Company, Richmond City Public Schools, November 1966

The Effects of a Commercially Prepared Reading Readiness Program on the Reading Achievement of Pupils in Grade One, Newport News City Public Schools, March 1967

REGIONAL EDUCATIONAL LABORATORIES. Staff members of the Division of Educational Research and Statistics represent the Department in three regional educational laboratories. They are the Central Atlantic Regional Educational Laboratory (CAREL), Appalachia Educational Laboratory (AEL), and the Regional Educational Laboratory for the Carolinas and Virginia (RELCV).

Function 4: To provide a two-way flow of educational data between local school systems and the Department of Education.

Through machine data processing, information can be made available quickly and in much greater quantity and depth for use on State and local levels. Such data are valuable for use in policy making, in interpreting the educational program to the public, and as a basis for educational research.

Activities and accomplishments related to data processing during 1966-67 are summarized below:

1. Meetings were held during the year with data processing personnel in local school divisions to coordinate local and State planning for increased efficiency in the use of machine data processing.

2. The information necessary for several research studies was collected and machine processed for analysis. This included a survey of more than 50,000 of the State's 1967 June high school graduates.
3. The Preliminary Annual High School Report was machine processed for both public and private schools.
4. In cooperation with the Division of Teacher Education, the certification status of all school personnel in Virginia is maintained through electronic data processing. This includes the updating of teacher certificate files on a biweekly basis and the printing of certificates by machine.
5. Plans were prepared for a School Identification Information System to go into operation in the fall of 1967; for a Fall Enrollment Reporting System also to be in operation during 1967; for the collection and machine processing of the information on the Elementary School Report. This will go into operation in the fall of 1967.
6. The General Educational Development Tests were scored by machine.
7. Plans were developed for the machine processing of information concerning Title I of Public Law 89-10.
8. Reports were processed on a monthly basis for all schools participating in the School Lunch Program.
9. Data were processed and supplied to various divisions of the Department of Education and to other agencies and individuals. Also, plans for future machine applications were discussed with representatives of the divisions of the Department of Education.
10. Additional equipment was obtained thus increasing the capacity of the data processing center to process data and to do it faster. An example is an optical scanning machine which helps decrease the time involved in putting data into computer usable form for analysis, especially of large-scale data collections.

DIVISION OF TEACHER EDUCATION

Purpose and Scope

The Division of Teacher Education is responsible for administering the programs for teacher certification, teaching scholarships, accreditation of colleges, in-service education of teachers, and scholarships for law enforcement officers. Following is a summary of the Division's responsibilities and activities during the 1966-67 fiscal year in each of these areas.

Certification of Teachers. The Division interprets standards, advises applicants and colleges concerning courses which may fulfill requirements for teachers, issues new certificates, and renews certificates. Reports of instructional personnel submitted by division superintendents are checked each school year with records in the Division of Teacher Education. When reports are approved, indicating that all teachers in the public schools are properly certificated or licensed to teach, copies are made for the permanent records of the State Board of Education and local school boards.

Revised regulations which were approved by the State Board of Education during the year will be in effect for teachers applying for certification to teach in Virginia schools beginning July 1, 1968. The revisions are based on the recommendations of a special committee of public school and college representatives which was appointed by the State Superintendent of Public Instruction in 1965. As a result of these revisions, which are the first which have been made in the certification regulations since 1960, Virginia's general educational requirements for teachers will compare favorably with those in other states.

Teaching Scholarships. This program of scholarship aid is available to residents of Virginia who are preparing to teach or who need to improve their qualifications to teach in Virginia public schools.

Scholarship aid which is in the form of loans, cancellable by teaching, may be used only in State-supported or private nonsectarian institutions of higher learning in Virginia.

During the 1966-67 school year, 4,888 Regular Term State Teachers' Scholarships were granted. In addition 730 Prorated Summer Quarter Scholarships were granted to prospective teachers who were seeking to secure a degree in less than four calendar years.

Accreditation of Colleges. By direction of the State Superintendent of Public Instruction, the Division selects committees to visit institutions applying for accreditation and presents the reports of the findings and recommendations of these committees to the State Board of Education. The Division also makes available staff services of an advisory nature to colleges desiring to make self-evaluations of their programs.

During the year, the following colleges were accredited by the State Board of Education:

Father Judge Mission Seminary, Monroe, Va., was accredited as a junior college and approved for the granting of the Associate Degree in Arts.

Virginia Western Community College, Roanoke, Va., was granted provisional accreditation for the awarding of the Associate in Arts, Associate in Science, and Associate in Applied Science Degrees.

In-Service Education of Teachers. As a result of appropriations by the General Assembly, the State Board of Education has provided financial assistance to help teachers become more proficient in their teaching fields. These planned programs for the in-service education of teachers constitute an important part of the effort to improve the quality of public education in the State. During 1966-67 over 8,000 teachers were enrolled in: (1) specially designed extension courses offering college credit in their teaching subjects; (2) summer graduate courses offered at State colleges to give selected teachers the opportunity to keep up with developments in history, economics, government, English, foreign languages, guidance, mathematics, science, reading, or other subjects usually taught in the elementary schools; and (3) courses to qualify teachers to teach additional subjects in public schools.

Law Enforcement Scholarships. The General Assembly in 1966 appropriated a maximum of \$25,000 to be used for law enforcement scholarships and assigned responsibility for the administration of the program to the State Board of Education. The act states in part:

“Any law enforcement officer of the State, or of any county, city or town thereof who attends any college which offers a degree or associate degree in Law Enforcement, may upon application and acceptance in such college in an accredited course toward such degree, apply to the Department of Education for Virginia for reimbursement of the tuition paid for such course.”

During 1966-67, expenditures for the scholarships totaled \$6,653, which represented one-half of the amount to which each recipient is entitled. After a recipient of a scholarship has served one year in a law enforcement capacity immediately following completion of the course, he is entitled to receive the balance of the scholarship which shall not exceed a total of \$80 per course.

**OFFICE OF THE SPECIAL ASSISTANT TO THE SUPERINTENDENT
OF PUBLIC INSTRUCTION**

The Special Assistant to the Superintendent of Public Instruction administers the Elementary and Secondary Education Act of 1965 (Public Law 89-10) and Public Laws 874 and 815.

The organization for the administration of Title I of P. L. 89-10 embraces: A program director who is the principal administrator for Title I; a coordinator who is responsible for analyzing the educational soundness of applications for Title I projects and programs; four assistant supervisors with regional headquarters at Abingdon, Lynchburg, Warrenton, and Richmond, who assist in developing projects at the local level; an assistant supervisor whose principal responsibility is the evaluation of Title I projects: an educational grants advisor who reviews applications to make certain that they comply with the law, and with rules, regulations, and guidelines for administration of the program; an accountant; a key punch operator; and two secretaries.

The directors of the divisions in the State Department of Education aid the Special Assistant in the administration of Title V of P. L. 89-10. The Department's Division of Educational Research is the liaison agency for the Title IV program, and the Library and Textbook Service is responsible for administering Title II. An additional assistant supervisor and clerical person were employed during the year to assist with the Title II program. Title III of P. L. 89-10 and Public Laws 874 and 815 are administered by the Special Assistant to the State Superintendent of Public Instruction.

A brief summary of each of the laws follows.

TITLE I, P. L. 89-10

Title I provides funds for compensatory education for educationally disadvantaged children whose performance is not up to the level that is appropriate for their ages and grades. These children must be reached through "target schools"—schools in which the percentage of children from low-income families (family income of less than \$2,000 per year) exceeds the percentage for the county or city as a whole, or schools in which the number of children of low-income families is higher than the average number of such children per school in the county or city. Title I also provides funds for educational programs for children in State-supported schools for the handicapped, for children in State-supported institutions for the neglected and delinquent, and for the children of migrant agricultural workers.

Title I funds available to the State during 1966-67 totaled \$23,985,037 and included the following:

The allocation for children in low-income families for 172 projects in 112 school divisions.....	\$ 23,658,931
The allocation for children in State-supported schools for the handicapped.....	192,796
The allocation for State-supported schools for the neglected and delinquent.....	33,310
The allocation for grants to counties for the children of migrant agricultural workers.....	100,000

The areas of instruction that occurred with the greatest frequency were reading and language arts, cultural improvement, mathematics, pre-school programs, physical and health training, special education of the handicapped, and music and art.

Comprehensive evaluation reports from local school divisions indicate that substantial progress was made with Title I projects throughout the State.

TITLE II, P. L. 89-10

Title II provides funds for textbooks, library books, audio-visual and other instructional materials. One dollar per pupil in average daily attendance (1965-66) in the public schools, plus \$1 per pupil in average daily attendance in the eligible private schools, was made available to the public schools for the purchase of library books and other instructional materials in the first allocation. The second allocation was based on locally taxable wealth per pupil, books per pupil, and the combined local and State expenditures per pupil. The average for this allocation was \$1.20 per pupil.

Title II funds also may be used to purchase library resources for schools operated by State agencies that provide instruction at the elementary and secondary school levels. During 1966-67, seven schools operated by State agencies received allocations totaling \$3,955.62 for 1,800 pupils. Pupils enrolled in eligible private schools may borrow library materials purchased with Title II funds. During the school year 36,386 pupils enrolled in 108 private schools availed themselves of this opportunity. These private schools are located in 37 school divisions. Virginia's total authorization for Title II funds during the year amounted to \$2,132,269, of which \$2,106,503 was allocated for 268 projects in eligible schools.

TITLE III, P. L. 89-10

Title III of P. L. 89-10 provides federal funds to those localities initiating innovative projects to improve instruction and to establish exemplary school centers. In the development of projects, local education agencies are encouraged to cooperate with other education agencies in the community and with business and industry. They also are encouraged to develop projects which involve a variety of disciplines. The law requires that the results of these projects be disseminated. As of June 30, 1967, 26 regular applications under Title III had been approved by the U. S. Office of Education and were either in operation or at the point of implementation. In addition 19 applications for planning grants of \$25,000 or less were approved. The Title III projects were well distributed geographically and were representative of school population densities. The Title III projects included: laboratory centers for reading; instructional materials centers; non-basal textbook reading programs; advanced mathematics, T-V; inter-suburban planning and curriculum improvement; stringed music instruction; mathematics and science centers; performing arts; use of modular scheduling in curriculum improvement; in-service education for elementary school teachers; a program for the academically able; kindergarten programs and humanities orientation.

Virginia's allotment for fiscal 1966-67, including an unexpended balance of \$353,145.20 from the preceding year, amounted to \$3,343,556.20. The approximate total of commitments for projects during the year was \$3,300,000.

TITLE IV, P. L. 89-10

To some extent Title IV which places major emphasis on the establishment of regional educational centers, is a revision of the 1954 Cooperative Research Act. The State Department of Education cooperated in the establishment of, and is affiliated with, three regional research laboratories for which operational funds have been provided. They are: Appalachia Educational Laboratory, Inc., Charleston, West Virginia; Central Atlantic Regional Educational Laboratory, Alexandria, Virginia; and the Regional Educational Laboratory for the Carolinas and Virginia, Durham, North Carolina.

TITLE V, P. L. 89-10

Title V provides funds for strengthening state departments of education. Under the program applications were approved for establishing additional professional and clerical positions, providing consultants for Department seminars and workshops, and purchasing educational and office equipment. Project applications totaling \$377,484 in Title V funds were approved by the U. S. Office of Education for the fiscal year. As of June 30, \$152,833.64 had been spent by the State Department of Education.

PUBLIC LAW 874

Public Law 874, enacted originally in 1950, provides funds for the operation of schools in counties and cities in federally impacted areas. To be eligible to receive these funds, the federally connected pupils in a local school district must represent a minimum of three percent of the total average daily attendance for the district, or 400 pupils. Funds are sent directly to the treasurers of the local school districts, and are not distributed through the State treasury. Forty-nine counties, cities, and towns in Virginia received \$24,614,138 during 1966-67 under this law.

PUBLIC LAW 815

Enacted originally in 1950, Public Law 815 provides funds for school building construction in federally impacted areas. Administrative practices for this legislation are similar to those for P. L. 874, but additional emphasis is placed on a rapid increase in the number of federally connected pupils. Ten counties and cities in Virginia received \$4,163,515.75 under this law during 1966-67.

DIVISION OF ADMINISTRATION AND FINANCE

The Division of Administration and Finance is responsible for distributing State school funds to the localities in accordance with the provisions of the Appropriations Act. It is the "clearing house" for administrative details and related business transactions and maintains personnel and fiscal records for the Department. It collects any portion of teacher scholarships not cancelled by recipients through teaching in the public schools of Virginia and administers the pupil scholarship program.

The Division examines school attendance records and National Defense Education Act (NDEA) records at the local level. School Record Examinations have been completed in 45 counties and 5 cities; NDEA audits have been completed in 90 counties and 19 cities.

The Director of this Division also serves as Administrative Assistant to the State Superintendent of Public Instruction. He is responsible directly to the State Superintendent. As Administrative Assistant he is responsible for assembling budgetary data and in light of decisions of the State Superintendent, takes steps necessary for the detailed preparation of biennial budget requests by the State Board. He consults with the directors and supervisors on fiscal matters and is responsible for the employment of the secretarial and clerical staff. In addition, he is in charge of purchases and supplies, obtaining space for Department offices, administration of the shipping rooms, and other administrative matters affecting the operation of the agency as a whole. He works closely with the State Superintendent concerning the establishment and appraisal of Department administrative policies and preparation of materials for consideration by the State Board in the adoption of fiscal policies.

SURPLUS PROPERTY

Effective January 1, 1967, the Federal Surplus Property Program was transferred, by executive order, to the Department of Purchases and Supply.

The following financial and statistical tables present a more detailed picture of the operation of Virginia's public school system for 1966-67.
